

# KPSPOT

## ANTI-SPATTER SPRAY

Made in / Fabriqué au Canada 🇨🇦

When sprayed on surfaces to be welded, KPSPOT's coating agents form a protective layer that prevents weld spatter from adhering to treated areas. Ideal for use in steel, stainless steel and aluminum welding, KPSPOT minimizes cleaning time for metal to be painted, plated or galvanized. It is biodegradable, non-toxic and non-flammable, emits no noxious fumes or odors, and has a long shelf life.

### DIRECTIONS

No mixing required. Simply spray on surfaces to be welded. Spatter will not adhere to treated areas. Remove with damp cloth.

### STORAGE AND HANDLING

Store in a clean, dry place away from direct sunlight.

### PRECAUTIONS

Wear rubber boots, impervious gloves, a plastic apron and protective glasses. Avoid all contact with skin. Keep away from sources of ignition. Handle in a well-ventilated area.

### FIRST AID

In case of contact with eyes, flush thoroughly with water and get medical attention. See Material Safety Data Sheet.
