ECR3700

ECOWATER 3700 SERIES WATER CONDITIONER

The Latest Technology for Water Treatment

- 1 HydroLink Plus® Wi-Fi and Smartphone App Monitoring**
HydroLink Plus® – Wi-Fi enabled technology sends continuous and excessive water use, system error, low salt and service reminder alerts, including a water-to-drain sensing alert notifying you when an excessive amount of water is going to drain.
HydroLink® – Patented two-way remote monitoring also available.
Highly Efficient Counter-Current Regeneration
Water Meter
Allowing for chemical feed dosing, flow switch operation and water use information.
- 2 Patented Electronics Digital Demand Module**
Sophisticated, yet easy-to-use electronics capture historical usage patterns to predict future needs for precise regenerations.
- 3 High Quality Fit and Finish with Dampened Hinge Salt Cover**
- 4 Multi-Wrap Fiberglass Reinforced Resin Tank**
Durable tank liner will not deteriorate, rust, or corrode.
- 5 Full One-Inch Riser with Self-Cleaning Distributors**
One-inch diameter for increased flow rates, which ensures that household demand is adequately met. Distributors exhibit excellent flow rates and are cleaned automatically by counter-current water pressure.
- 6 Patented Stratified Resin Bed**
Layered mix of fine and standard size resin provides superior filtration and iron removal without sacrificing flow rate capability.
- 7 Washed Quartz Underbedding**
Helps provide a cleaner, more thorough regeneration of the resin.
- 8 Positive-Action Brine Valve**
Snap-together construction eliminates use of solvents that may contaminate water. Positive action helps prevent overfilling.

Automatic Salt-Level Detection and Tank Light

Simply add salt, no salt level setting required. Our integrated sensor will detect the salt level and alert you when the salt level is low.

Plumbing Connection Provided (inches)	1	1

Electrical Requirement, 120V, 50/60Hz, (24V DC, 500 mA, power supply included)

¹Intermittent flow rate does not represent the maximum service flow rate used for determining the conditioner's rated capacity and efficiency. Continuous operation at flow rates greater than the certified flow rate may affect capacity and efficiency performance. The validity of these flow rates is verified by NSF. ²Increased amounts of clear water iron can reduce conditioner's efficiency. Refer to owner's manual for details. Wisconsin requires additional treatment if water supply contains greater than 5 ppm clear water iron. ³When operated at 35 psi water pressure. ⁴Maximum pressure for Canadian use is 7.0 Kg/cm².

WARRANTY

- For the lifetime of the original owner, the salt tank and mineral tank will not rust, corrode, leak, burst, or in any other manner fail to perform their proper functions.
- For a period of ten years, the valve body will be free of defects in materials and workmanship and will perform its proper function.
- For a period of seven years, the electronic faceplate will be free of defects in materials and workmanship and will perform their normal functions.
- For a period of five years, all other parts, including the HydroLink[®] remote will be free of defects in materials and workmanship and will perform their normal functions.

Your Water. Perfected.
