

PROGRESS LUV2PAK
INTERNATIONAL LIMITED

RETAIL GIFT PACKAGING

FROM HUMBLE BEGINNINGS OVER 100 YEARS AGO, PROGRESS LUV2PAK HAS EMERGED TO BE NORTH AMERICA'S LEADER IN PREMIUM RETAIL & GIFT PACKAGING.

OUR HISTORY

In 1917, a European immigrant came to Canada, couldn't speak the language or find employment, so to earn a living, he opened a box factory in Toronto. At that time, any item of clothing, hat or gift came in a beautiful box that Progress produced.

Over time, the business evolved and responded to our customers needs.

In the 1980's our customers became interested in premium packaging that wasn't manufactured in North America. We scoured the globe and developed partnerships with factories that shared our relentless focus on quality across categories that complemented our existing lines of rigid and folding boxes. These partnerships opened an opportunity to create a line of stock packaging we called Luv2Pak. Over the last 30 years, we have curated a mix of over 1,000 items that are coordinated, on-trend and sustainable. A retailer of any size could now purchase a full suite of premium packaging across all major categories in quantities as low as a case.

Concurrent to that, we honed in on sustainability. Our brand Give Green is a symbol to how our packaging could not only be beautiful, but could also be Recyclable, made from Recycled Materials, Reusable or Carbon Offset. We were one of the first Retail Packaging providers to have this drive on Sustainability, and it remains a core focus of ours to this day.

As our business has evolved, we still remained true to our roots. A family-run business, that prides ourselves on the quality of our products and the relationships we have built with our customers, many of whom have worked with us for decades.

Our over 100 years of packaging heritage have given us a tremendous advantage to support Retailers and Brands with premium, sustainable packaging.

Please reach out - we would love to work with you!

WHAT WE DO

Packaging Design – We are experts in Structural and Graphic design. We thrive on innovating and creating packaging designed to best suit your product and brand. We've even invested in 3D Design for rapid prototyping and concept review.

Coordinated Programs – Your brand is your identity. It's often challenging for multiple packaging items to have the same look and feel. It is our mission to create a coordinated, curated program, regardless of the number of items or categories purchased.

Highly Controlled Manufacturing & Quality Control – We've developed partnerships with over 50 leading global factories. It is critical that Mass Production match the samples approved, and every shipment inspected by one of our in-house or 3rd party QC. We deeply understand manufacturing tolerances, and have developed a rigorous framework to ensure consistency, whether the order is 10,000 or 10 Million pieces.

Global Logistics, Warehousing & Distribution – We have decades of experience in managing the complexity of global freight. Our network of freight forwarders and global logistics partners can tailor a solution to fit your needs. Whether it is a one-time shipment (delivered on-time), or a multi-year, multi-destination, direct-to-store program with warehousing & storage (or anything in between), we are set up to handle it!

Cost & Sustainability Value Engineering – We understand that budgets are always a constraint, and are well positioned to work within them. We know how to shave pennies where necessary, and how to provide innovative solutions that can maximize the efficiency of any program. In addition, we would be proud to develop and produce sustainable alternatives to any component of any project.

Fulfillment, Co-Packing & Complexity – We thrive in complexity. It is common for us to assemble multiple components and co-pack a program from multiple vendors. We can tailor-make a project to fit your imagination and can quickly scale a fulfillment team locally or offshore to fit any project.

SUSTAINABLE PACKAGING

As an industry pioneer in sustainable packaging, Progress Luv2Pak is committed to the care of our planet and considers ecological impact in every decision we make.

Our Give Green initiative provides a framework of four categories to critically assess our extensive range of sustainable packaging solutions in order to help our clients define their goals.

Our **Give Green** represents qualified solutions under any of our 4 pillars of sustainable packaging.

1. CONTENT

RECYCLED MATERIALS:

Defining the percentage of recycled content, whether it is post-consumer (PCR) or post-industrial (PIR).

RENEWABLE MATERIALS:

Materials derived from rapidly regenerating materials such as bamboo, grass pulp, sugarcane and more.

THIRD PARTY CERTIFIED MATERIALS:

Progress Luv2Pak is proud to be accredited to offer a triad of the world's best chain of custody certifications for our paper products. We offer materials certified from managed systems, with options for 100% virgin fibre coming from managed forests, recycled content coming from managed recycling streams, or a mix of both.

SUSTAINABLE FORESTRY INITIATIVE
Good for you. Good for our forests.
SFI-00722

2. USE

REUSABILITY:

Packaging designed with enhanced durability and/or functionality in mind for maximum, meaningful reuse, whether it be a shopping bag engineered to exceed all legislated standards for reusability or a premium gift box that offers secondary use as a keepsake vessel.

3. DISPOSAL

CURBSIDE RECYCLABILITY:

For packaging to be truly recyclable, it must be accepted in the municipal recycling programs where your products are sold and should have clear instructions on any disassembly required for responsible recycling.

COMPOSTABILITY:

The item must be compostable in a home or industrial composting system. If the item requires industrial composting, such systems must be available in the municipalities where your products are sold. Shelf life must be considered for operational feasibility.

4. FOOTPRINT

CARBON OFFSETTING:

Using various third party carbon offsetting organizations, we are able to calculate the overall carbon emissions related to each packaging solution (comprised of: materials, production, freight and disposal), and the value of funding an equivalent carbon dioxide saving project, such as reforestation.

PAPER SHOPPING BAGS

An endless range of materials, finishes and handles to suit your brand, from economical simplicity to sophisticated luxury.

Sustainable solutions for this category include: renewable content, recycled content, third party certified materials, recyclable and compostable options.

REUSABLE BAGS

From poly bag replacements to resale reusable bags, select from auto-sonic and sewn structures in RPET, PP, PE, cotton, polyester, bamboo and more.

Sustainable solutions for this category include: recycled content and reusable options.

OUR DESIGN PROCESS

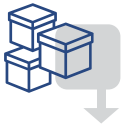

FROM CONCEPT TO DELIVERY

PACKAGING CONSULTATION

Our packaging experts will assess your needs and present on:

- Structures
- Materials
- Print finishes
- Sustainable options
- Cost savings & value added solutions

CONCEPT ILLUSTRATION

The graphics team prepares a sketch form of the creative brief

STRUCTURAL DESIGN

Our team will create precise die lines to industry standards

GRAPHIC DESIGN

Rely on our in-house graphic design team to position your artwork and ensure it is production-ready

3D RENDERINGS

Photorealistic 360° view of your product to show its functionality and elements

PROTOTYPING

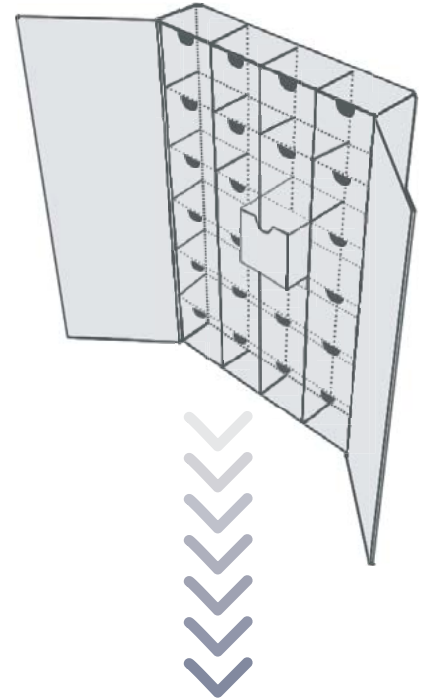

Creation of pre-production sample for your final approval

MASS PRODUCTION

Our in-house quality assurance team monitors production and conducts pre-shipment inspections to match prototypes within defined tolerance ranges
