Circe Wall Bed

Resource

OPENING YOUR CIRCE WALL BED

1 **Remove back cushions** from sofa and store aside.

2 **With a finger, pull out the bottom of one of the legs** located in the space between the front panel and the structure of the bed. **Lift up the leg about 30 degrees** to release the safety latch.

⚠️ **Do not attempt to close the bed without releasing the safety latch.** If you lift the leg too far in error, pull down on the safety latch above the leg to release.

3 Grasp either one of the legs to pull the bed down.

Make sure to **support the bed frame** for the entire descent until both legs are resting on the floor.

NOTE: The **Circe will then be safely locked in place** in the open position.

4 **Release** the two mattress **straps** by squeezing the center of the clasp.

Tuck the **straps** under the mattress.

5 **See you in the morning!**

⚠️ **Do not attempt to close the bed without releasing the safety latch. See reverse for instructions on releasing the safety latch.**

⚠️ **Do not attempt to close the bed without releasing the safety latch.**

CLOSING YOUR CIRCE WALL BED

1 **Remove bed pillows** and tuck bedding in on all sides around and under the mattress.

Latch both mattress straps over the bedding.

2 **Release one of the safety latches**. Stand at the foot of the bed at either corner. Using one hand, **apply gentle downward pressure on the bed** while **pushing down on one of the release levers** with the other hand. You do not have to release both latches.

Once properly released, the bed will be easy to lift. If you feel any resistance, let go and repeat step 2.

⚠️ Oh, and did we mention: **Do not attempt to close the bed without releasing the safety latch?** I thought so.

The all-important Safety Latch

3 Continue to **lift bed frame** as you walk forward toward wall. The sofa will rise as the bed frame closes.

Push bed frame into structure until you hear both safety latches above the legs **"click" into place.** This indicates that the bed is now fully locked.
NOTE: Your Circe Sofa is designed so that most bedding can remain on the bed when closed. If you experience any difficulty closing the bed, your bedding might be too thick.

4 **Have a great day!**

⚠️ **Just one more thing: You can stand on principle, but never stand on the sofa!**
