

Custom Cable Order Measurements

For custom cable order, please provide the following measurements (use a chunk of rope - 1/2" works best, and measure center-to-center). In the A and B columns, I need to know what size the terminal is (you can use a drill bit set to make measuring easier). Some cables might be in different locations, or might not exist, but we'll work around that.

VEHICLE (make, model, year) _____

POSITIVE (+)	Length A to B	Terminal Size (A)	Terminal Size (B)
Battery to Fuse			
Fuse to Alternator			
Battery Positive to PDC (or fuse box)			
PDC (fuse box) to Starter			
NEGATIVE			
Battery Negative to Fender			
Battery Negative to Engine block			
Engine Block to Body/ Frame			

Additional notes: _____
