

# How Long Does Northern Lights Auto Take To Flower - Sour diesel automatic grow tips

CLICK HERE TO SHOP ONLINE: <https://t.co/Fkifs5YDaM>

For an autoflower, Northern Lights Autoflowering can reach an impressive height of 120cm and she can do it very fast in only 9 weeks from seed to harvest. Because of her good size for an autoflower and some massive buds, she can give you as much as 200g of some aromatic and resin-oozing NL goodness if you grow her in good conditions. Northern Lights Auto is an exceptionally tough autoflower that requires very little maintenance while being able to withstand harsher climates with ease, this plant can grow up to 120cm and produce around 600gr/m<sup>2</sup> in less than 65 days. Northern Lights Auto is a stable high-yielding strain with a high THC content of up to 23%. NL Auto is highly adaptable to all growing environments; indoors it grows into a small to medium-sized plant enjoying 18 hours of light per 24 and finishing its life-cycle in 55 - 60 days. The strain yields up to 500 g/m<sup>2</sup>. When to Harvest Northern Lights - Flowering Time Northern Lights can flower in as little as 6 weeks, much faster than many other marijuana strains. The Northern Lights strain is a smaller plant, and will grow on average, up to 30 inches tall.

??Gracias a la diseñadora del grinder aemetesanal hecho a mano con semillas ?? @weed.resin por este maravilloso diseno exclusivo para @semillasrevolucionarias ?? esta siendo todo un exito entre nuestra comunidad??! [site web](#)

My northern light auto is 60 days old and has been in flower since day 21.It looks ready to harvest but how can this be at 60 days....all primary lvs gone,just small sugar lvs around the buds.The top cola isn't that big,about 6 in,but its solid and smells wonderful.theres about 25 or 30 other smaller buds but there solid too.I do not know ... #sun #autocultivo #cannabisgrower #weedplant #20sonlegales #goodday #legalicelaustedmismo #growth #grow #growing #ganjagirls #grower #flowers #flower #flores #flor #tricomas #Trichomes As the name suggests, autoflowering strains don't require a change in the light cycle to enter the flowering stage. Many growers choose to keep their autoflowers on a light schedule of 18 hours on and 6 hours off during the entire growing cycle.

WARNING:Cannabis products have intoxicating effects. Marijuana can impair concentration, coordination, & judgment. Do not operate a vehicle or machinery under the influence of this drug. There may be health risks associated with consumption of this product." For use only by adults 21+. Please consume your marijuana while in Washington State. Enjoy your marijuana safely and in moderation. Keep out of reach of children. \*\*Nothing For Sale Greenhouse seeds, royal queen seeds, etc The reason I ask is after a quick search online most Northern Light Auto strains finish anywhere between 8-12 weeks depending on the company. If I had to guess I would say stress has delayed your plants growth. Nothing to worry about.
