

RETURN PACKING INSTRUCTIONS

1. Start with the assembled bassinet. Remove the bassinet board and mattress. Angle the seat recline connectors as far back as they will go.

2. Fold the the seat into its plastic bag, and then place it into the bassinet.

3. Put the rear tyres into their bubble wrap bags, and place one on top of the other, into the bassinet next to the seat.

4. Do the same with the front wheels, and place one at the end of the bassinet, and one on the side of the rear wheels.

5. Next place the wrapped brake, the bumper bar, and seat liner on top of the seat and wheels.

6. Ensure the visor on your canopy is turned back, and place into the bassinet on top of the seat, and other items. Ensure you push it down as much as possible.

7. Place the bassinet board and then bassinet mattress on top.

8. Zip on the bassinet apron.

9. Place foot muff over the opposite end of the bassinet, and then the manual on top.

10. Collapse your frame and fold the handle under. Wrap your travel organizer up, and place it in the space at the back of the basket.

12. Put the cardboard protective packaging over the ends of the frame. Put the white foam protective packaging over the side frame connector sticks.

14. Wrap the frame in the plastic bag.

15. Sit the bassinet on top with the seat recline connectors at the same end as the white foam protective packaging.

16. Side opening box: Place the frame in first and then place the bassinet on top.

17. Top opening box: Both the frame and the bassinet need to be inserted together from the top opening.

18. Note: Don't worry too much if you can't get the box to sit flush as it came, as long as it's all in the box and protected that will be fine.
Do not force the box closed. This may crack the bassinet board.

19. Re-tape your box securely with lots of tape.

20. Print and place your return label clearly on the box ensuring the barcode is clean and clear.

And you're done!
