### **HEBEL ENCLOSURE**

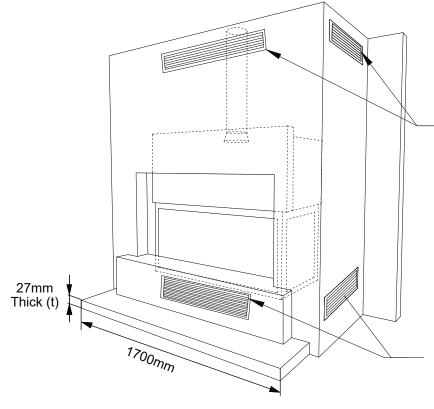

### **HEBEL ENCLOSURE**

## **Clearance Diagram**

A minimum surface area of 250cm2 is required for air outlet at the front of the cavity (directly below the internal deflector plate) on both sides. Optional side outlet grilles may be used for better heat dispersion however needs a 1200mm clearance from any combustible side structure

## Air inlet Grille

A minimum surface area of 250cm2 is required for air intake on either side of the bottom of the cavity underneath the unit, in line with the base of the fireplace. The air intake grill may alternatively be placed on each side of the cavity as well

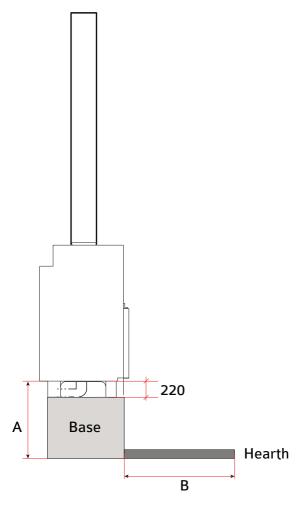

## Notes:

- 1. Air outlet grilles minimum air flow area required = 250cm2.
- 2. Air inlet grilles minimum air flow area = 250cm2.
- 3. All dimensions in millimeters.
- 4. Do not scale from these diagrams.
- 5. Air transfer kits mandatory for exempt units to comply to AS/NZ 4012/4013:2014. Fan optional depending on duct length.

IMPORTANT: NO BRICKWORK TO BE COMMENCED UNTIL FIREBOX IS PLACED IN POSITION
