SandMAXSM Sand Plants

Maximize the recovery of your saleable sand.

The SandMAX line of sand plants offer unrivaled versatility, productivity, and safety for turning your unwashed material into clean SPEC high quality sand

SandMAX sand plants produce one or two grades of spec sand on a single chassis, as well as blending capability between sand products. The result is low-moisture, market-ready clean spec sand for manufacturing, natural, or recycle sand applications.

SandMAX sand plants are also compact, cost-effective, and designed to operate with a low carbon footprint.
