— ALL OUR DOCTORS AGREE: —
**Collagen is extremely good for you,
*your face, skin, hair,
 nails, and joints***

“When it comes to feeling good and looking good, I am going to share my secret weapon... it is called Total Body Collagen. I take it with a vitamin C supplement in the morning for my hair, skin, nails, and bones, and it couldn't be easier. With Total Body Collagen, my hair is thicker and healthier and I lose less hair in the shower and in my brush. Fine lines and wrinkles on my face are getting better as I age and my skin looks and feels more hydrated. My nails are stronger with fewer ridges and grow much faster. As an added bonus, Total Body Collagen supports my bone matrix for healthy teeth and bone density.”

— Julie Reil, MD and Beauty Expert

**The power to
 revitalize, restore,
 and protect our
 total body from
 within.**

Is collagen good for men? Absolutely!

“It has been my clinical observation with thousands of patients that taking protein and collagen in the morning consistently creates positive outcomes in energy levels, cognitive and immune function, and overall general feeling of well-being... As we age our bodies produce less collagen, correlating with the increase in fine lines, wrinkles, and joint pain... Clinical data has shown the importance of collagen in maintaining healthy skin and joints.” — Gaetano Morello, ND

Does it help reduce the signs of aging? Yes!

Collagen hydrates our skin, reduces wrinkles, and gives us that plump, youthful glow.

“Unfortunately as we age, collagen density and dermal thickness decrease, and this lack of collagen cues the all-too-familiar signs of skin aging... In recent years there has been a growing body of evidence and even larger review studies that collectively point to the same conclusion – collagen supplements promote healthier looking skin, and decrease visible signs of aging, without any adverse side effects.” — Natasha Paroutis, Nutritionist

Whole Earth & Sea Our regenerative farms surge into *spring*

When we **rejuvenate the earth, the earth rejuvenates us.**
When we listen and work in harmony with nature, life thrives!

That's why for more than 30 years, we have been practising regenerative methods on over 1,000 acres of our certified organic farmland. These methods naturally revitalize the soil, promote ecological balance, and enhance the lives of all living organisms that are part of it.

From our bioenergetic farms, we harvest the most nutrient-dense components of our crops. Using our proprietary EnviroSimplex® process, we then create highly concentrated extracts, and stabilized plant minerals and enzymes.

Because of our commitment to these holistic restorative techniques, Factors Farms® meet the ABOV certified standard for better regenerative, bioprotective practices.

ABOV™ Verified
Agriculture Beyond Organic Verification

SCAN for further information on ABOV.

Bob and Doc – two of our “gentle giants”

THE HORSES – Using our resources to buy horses

Our horses contribute to the preservation of our beautiful Earth by promoting bio-diversity, reducing carbon emissions, controlling weeds, and improving soil fertility.

THE FROGS – Ground control

Frogs are permanent residents on our farm, and to benefit them, we have dug several ponds along the length of the farm close to the creek.

During the spring, countless tiny black tadpoles undergo a transformation into small froglets. As the ground heats up, these froglets leave the pond nurseries, and literally cover the farm, maturing and serving as an invaluable part of our “pest control” team.

THE BIRDS – Air control

There are dozens of bird species nesting in and around our farms. The allocation of wild areas and corridors

around the creek assures safe nesting grounds for many bird species. As part of the living, diverse farm ecosystem, they also form a unique airborne pest control crew.

Among the unique and interesting bird species making our farms their home is the Cliff Swallow. This species nests in huge colonies on our farm, mainly under bridges, which provide safe and permanent nesting areas.

THE POLLINATORS

Our regenerative, bio-protective farming practices also encourage the healthy population of natural pollinators (butterflies, bees, beetles, bumblebees, flies, hummingbirds, and some others), whose powerful pollination activity leads to increased yields of cultivated crops and improved biodiversity of the wild species present.

Wonderful Whole Earth & Sea

We grow & work with our hands.
This is where our multivitamins start!

Why is such care given to our farms? Because we believe the earth is perfectly designed, full of biodiversity and regenerative power.

Our **love** of what makes the earth so beautiful is in the seed we start with. It takes **commitment** to responsible stewardship, sustainable farming practices, and the cultivation of the biodiversity around us. To do all that, we grow and work with our **hands**.

More than simply organic, our farms utilize extremely delicate growing methods that promote the greatest biodiversity with insects, birds, and even amphibians. Our farms are where we hand-fertilize each of our crops with compost and nitrogen-rich sea plants, and tend to our crops by hand.

All flyer products are ISURA verified

The ISURA seal is your assurance that the product is independently verified as clean and safe, and has been tested for over 800 possible contaminants. ISURA's rigorous testing includes hundreds of quality procedures using state-of-the-art technology. It provides you with the confidence that the product is ISURA verified clean, one of the highest testing standards in the world.

Wow! Multis for mom & me!

These new beautiful multis are specially formulated for moms and moms-to-be!

Studies suggest balance exercises improve memory!

Start by balancing on one foot, then the other, for as long as you can, and keep building up your duration for as long as you can.

Patrick Holford

Alzheimer's is a disease that you can't reverse but it is a disease you can prevent.

How can you do that? You have got to have the homocysteine-lowering B vitamins along with omega-3 and phospholipids. This is important!

If you get your blood sugar right, get your B vitamin levels sufficiently

high so that you don't have raised homocysteine levels, and eat lots of vegetables, fruits, nuts, seeds, and other supplements that increase your antioxidation, then you're not really going to get this disease.

NEW BOOK FROM **PATRICK HOLFORD**, author + director of *The Alzheimer's Prevention Project*

SCAN ME

How is your cognitive health?

TEST YOUR COGNITIVE FUNCTION NOW!

It's completely free.

Watch Patrick Holford's three-minute video and then take the simple cognitive function test.

Your cognitive function score

You are aiming for your Dementia Risk Index (DRI) score index to be 0%

The cognitive test helps determine the things you're doing right, what to improve, and your biggest risk factors for memory loss and dementia.

Researcher and author Patrick Holford makes it very clear that omega-3, phospholipids (phosphatidylserine and phosphatidylcholine), as well as a coenzymated B complex can help prevent Alzheimer's.

Brain fog a clear way out!

Are your brain and energy levels feeling zapped?

Your brain is the most energy-demanding organ. As we get older, decreases in nutrient levels can impede our brain function, leaving us with brain fog, low energy, and fatigue. Poor concentration and memory problems can begin to show, especially in people with chronic stress.

These supplements can help boost our resistance to fog-inducing stress, reduce symptoms of fatigue, and boost energy production so you can stay focused and alert.

Ashwagandha: It can help provide relief from stress, improve cognitive flexibility, and support memory and focus.

BioCoenzymated B6 and B12: Numerous studies show that B6 and B12 can help improve attention and memory. Our BioCoenzymated B is an advanced active form of these vitamins – for quicker, easier absorption.

Vitamin D: Necessary for brain health, it helps maintain healthy nerves and offers mood support. (see page 20)

L-Theanine: It is an amino acid that helps calm our overstimulated brains, and promotes learning performance and concentration.

Regenerlife Mitochondrial Energy: This formula helps reduce symptoms of fatigue by optimizing energy production in cells, including brain cells. It's a powerful support for cognitive and brain health. (see page 15)

THE POWERHOUSE OF *Energy & life-long Vibrancy*

A surge for your cells!

Every cell in our body needs energy to function well. That energy comes from mitochondria, the tiny power plants in our cells. Regenerlife's powerful energy formula helps ignite cellular mitochondria to produce more energy (ATP) and regenerate your life.

Is it possible to *save your memory?*

Yes, you can protect your cognitive health!

CogniSave was formulated to help protect brain cognition.

This new product combines brain-nourishing phospholipids (phosphatidylserine and phosphatidylcholine) with ultra-high-absorption omega-3s and a powerful energy-boosting vitamin B complex.

- **Omega-3:** High-potency, pharmaceutical-grade EPA, DHA, and DPA
- **B Complex:** Full spectrum active B complex
- **Phosphatidylserine:** A phospholipid that protects brain cell membranes
- **Phosphatidylcholine:** A phospholipid that boosts cognitive function

These nutrients work harmoniously and may help protect against age-related cognitive decline. Convenient all-in-one packets take away any guesswork.

Prevention starts now, *not tomorrow!*

Healing Rhodiola for chronic stress

Rhodiola is an alpine flower that manages to thrive in harsh mountain cold. Similarly, it can help us boost our resistance to stress and heighten our mental stamina. Increased high potency is perfect for people facing stress-related burnout.

Meal replacements make a real difference

Sustainable and healthy weight loss is possible

Ozempic helps people feel less hungry, but it does not provide any nutritional value. Meal replacements deliver both **essential vitamins and minerals** and help reduce hunger.

A recent study found that participants who consumed RealEasy meal replacements with PGX® twice daily achieved a remarkable **7% weight loss in just 12 weeks!**

Julia Solnier, PhD, a principal investigator of the study, reports that “Meal replacements offer a natural, effective, and affordable solution that supports overall health and well-being – without disrupting the body’s natural metabolism and risking long-term health. Relying solely on medications like Ozempic without making changes to eating and lifestyle habits may result in lifelong medication use with potentially severe side effects and high treatment costs. Research also shows that individuals using Ozempic often regain two-thirds of the weight lost once they stop treatment, with up to 40% of the weight loss potentially consisting of lean body mass rather than fat.”

Although Ozempic can assist with weight loss, many do not take it as prescribed. Why could this be a problem? Some may embrace a “more is better” attitude with remedies, and may increase their dosage. But we do not know the long-term safety of higher Ozempic

dosages, or its effect on natural metabolism and the digestion process.

What makes RealEasy such a great meal replacement option? It combines full meal nutrition with the power of **PGX**, a soluble prebiotic fibre. Best of all, PGX is remarkably safe and 100% natural.

With PGX, the gut produces short-chain fatty acids (SCFAs) that stimulate GLP-1 secretion, the gut hormone associated with **satiety** that Ozempic-like drugs mimic. Beyond satiety, PGX offers additional benefits such as improved gut health, **reduced inflammation**, enhanced insulin sensitivity, and better metabolic health. Regularly replacing 1–2 meals a day with RealEasy is associated with superior long-term weight loss – and is simple to use.

“Meal replacements offer a natural, effective, and affordable solution that supports overall health and well-being.” – Julia Solnier, PhD

Reduce just 5% of your body weight and get huge health benefits for life.

Saffron & Stress Relief

It's no secret that stress is one of the most significant issues in today's society. One-third of Americans and 21% of Canadians are living with extreme stress.

Natural Factors Stress-Relax Saffron Extract has been clinically shown to help maintain a positive mood, promote restful sleep, and support emotional well-being. Saffron's crimson threads have impressive mood-improving and stress-relieving qualities that have been supported by clinical research. Natural Factors Saffron features affron®, a 100% pure source of standardized Spanish saffron extract that has been DNA-certified for authenticity and has undergone study in multiple clinical trails.

- Helps support mood balance in adults and youth over 12
- Helps relieve restlessness and nervousness
- Helps reduce the symptoms of perceived stress, such as fatigue, weariness, and irritability
- Helps improve restorative sleep in individuals experiencing sleeplessness
