## INSTALLATION

Before commencing installation ensure the relevant mains supply has been safely isolated/disconnected. Installation should be carried out by a qualified electrician. Ensure all electrical connections are tight with no loose strands, including factory made connections.

1. Fit the 3 lamps before starting the installation (see next page).
2. Remove the base from the installation bracket.
3. Affix the bracket to the ceiling with 2 screws (hole size max. 4.5 mm, 50 mm apart).
4. Connect the unit to the mains.
5. Fix the unit back on its base and retighten 2 screws on the side.

## LAMP INSTALLATION

- Before commencing installation ensure the relevant mains supply has been switched off.
- Use supplied fabric gloves to prevent any stains on the surface of the lamp.
- Due to risk of glass fracture handle the lamp with care!
- Whilst applying pressure push the socket into the lamp holder in the marked place. Remove the lamp from the lamp holder carefully with both hands.

## CARE INSTRUCTIONS

\* On very rare occasions, these lamps may appear to have a slight buzzing or flickering. As is the case with all retro LED lamps, this is likely caused by a number of outside influences such as incorrect installation, wiring, dimming or transformers and in some instances low electrical resistance.

\*\* Please contact [sales@kaialighting.com](mailto:sales@kaialighting.com) for further information on dimmers etc. Please note KAIA Ltd cannot take any responsibility for the connection with your dimming or central control system. It is the customer's responsibility to ensure the compatibility with their systems.
