Suspension
30

Type	Suspension light
Material	Solid brass
Environment	Indoors
Dimensions	11.81 x 4.92"
Cable Length	59.06"
Stem Length	19.69"
Stem Colour	Polished nickel
Weight	0.88 lb
Certification	IP20 CE; ETL US/CSA Canada
US	110V
Ceiling Rose	Ø 3.15 x 0.98"; flat Ø3.94"
Lamps	Glass lamps not available. Please inquire.

INSTALLATION

Before commencing installation ensure the relevant mains supply has been safely isolated/disconnected. Installation should be carried out by a qualified electrician. Ensure all electrical connections are tight with no loose strands, including factory made connections.

1. Remove the base from the installation bracket.
2. Affix the bracket to the ceiling with 2 screws (hole size max. 0.18", 1.97" apart).
3. Connect the unit to the mains.
4. Fix the unit back on its base and retighten 2 screws on the side.

LAMP INSTALLATION

- Before commencing installation ensure the relevant mains supply has been switched off.
 - Use supplied fabric gloves to prevent any stains on the surface of the lamp.
 - Due to risk of glass fracture handle the lamp with care!
 - Whilst applying pressure push the socket into the lamp holder in the marked place.
- Remove the lamp from the lamp holder carefully with both hands.

CARE INSTRUCTION

1. Use a soft dry cloth to ensure a fingerprint free surface. We recommend the use of micro fibre cloths.
2. Warning: do not use alcohol or other solvents for cleaning.

* On very rare occasions, these lamps may appear to have a slight buzzing or flickering. As is the case with all retro LED lamps, this is likely caused by a number of outside influences such as incorrect installation, wiring, dimming or transformers and in some instances low electrical resistance.

** Please contact sales@kaialighting.com for further information on dimmers etc. Please note KAIA Ltd cannot take any responsibility for the connection with your dimming or central control system. It is the customer's responsibility to ensure the compatibility with their systems.
