

Cleanskin Digital Shock Pump User Manual

Remove the battery insulation sheet before use (fig 1)

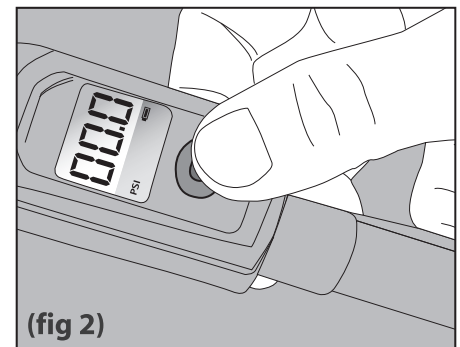

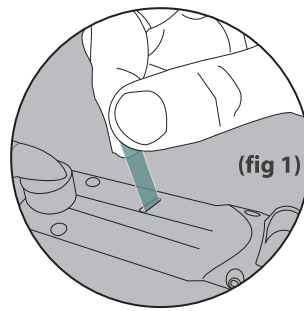

Button Functions

1. Button "A" → Power/Change units (PSI → BAR → KG/CM²)

Operation Mode

Start-Up

1. Manual start-up → Press Button "A".
2. Automatic start-up → When pressure is above 5 psi the digital gauge will turn on automatically.

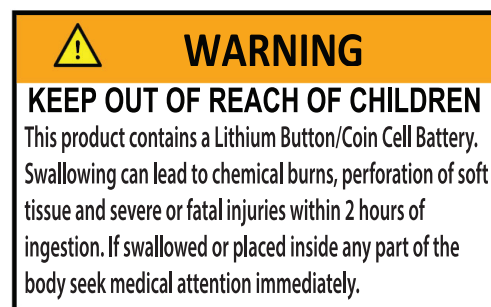

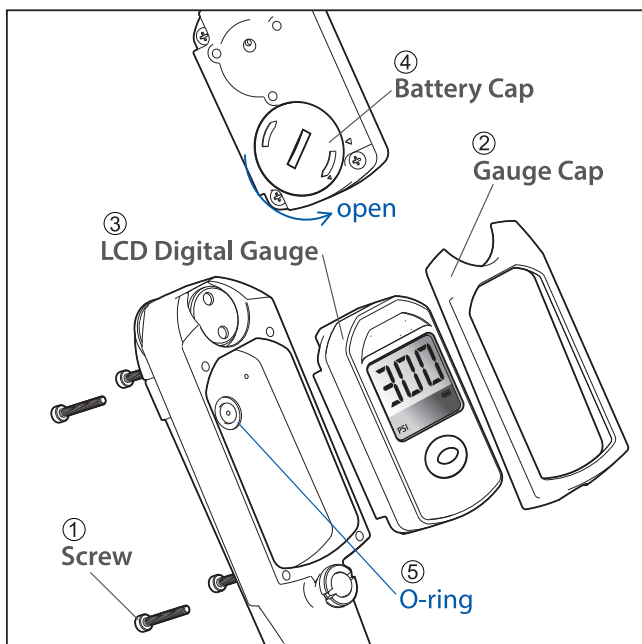

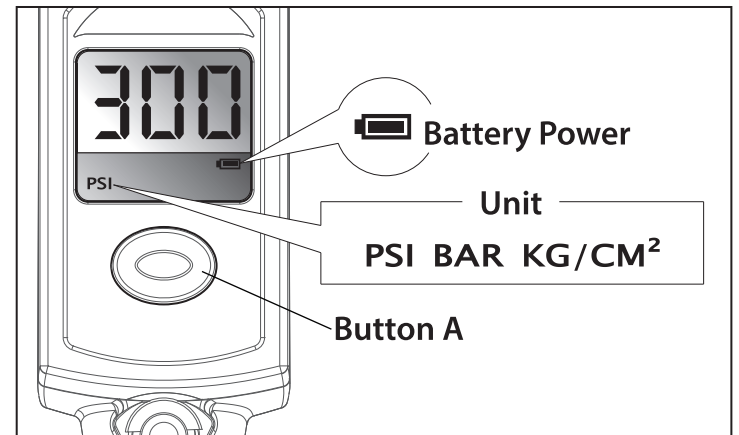

Trouble shooting

To reset the gauge press and hold Button A for 9 seconds to return the gauge to zero(0). (fig 2)

Battery Replacement

- ① Unscrew the 4 screws that are on the back of the gauge base
- ② Lift out the gauge cap
- ③ Take out LCD digital gauge
- ④ Open battery cap and replace the new 3V battery(CR2032). Please note that the positive pole (+) should face towards the battery cap and be inserted correctly.
- ⑤ Please make sure the O-ring in the bottom of the gauge is still there when replacing the battery

Battery Disposal

- Please ensure safe disposal of discharged button/coin batteries immediately.
- Place sticky tape around both sides of the battery and dispose of it immediately in an outside bin, out of reach of children, or recycle safely.
