# RAM05SS

## WHAT'S IN THE BOX

### Front Muffler Assembly

The front muffler assembly bolts to the original flange location of the OE muffler pipe allowing for quick installation without the need for modifications. The single 3" pipe separates into a twin chambered muffler with the use of a pressed stainless steel Y-Pipe. Vertical adjustment is made through the muffler hanger which has been e-coated for superior protection.

### Over Axle Assembly

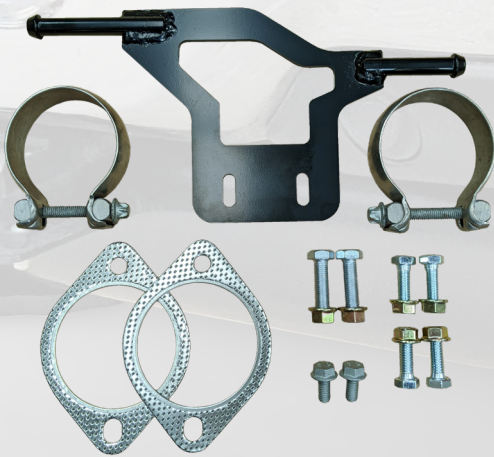

Efficient selection of 2.3/4" over axle pipes allows the exhaust gasses to flow through the system at the same rate, improving performance and sound. A single over axle section coupled with a LHS extension pipe bolts to the rear of the muffler assembly with only 4 bolts. Fitment of the components is a breeze with the Stainless Steel clamps welded in place...just rattle them up for a secure connection.

### Tailpipes

Ultimate flow and sound performance are achieved with the 2.3/4" tailpipes that are finished in either Black Chrome or Polished Stainless 4 1/2" exhaust tips. Get the perfect positioning to the bumper by adjusting the ball joint clamps we have used on both outlets.

### Full Fitting Kit

As with all Outlaw Performance Exhaust kits, our RAM05SS system is supplied with high quality fasteners, gaskets and clamps.

Distributed by:

\* Fitment and design confirmed on Walkinshaw converted DT Ram vehicle only. Whilst all efforts have been made to ensure fitment accuracy based on the data available to Mercury Mufflers, certain generations and factory/aftermarket components may result in the modification of the supplied Exhaust upgrade. Mercury Mufflers do not take responsibility for additional charges that may be required in the event of these circumstances. The 5-year warranty provided on Outlaw Exhaust systems covers only the supplied product at time of purchase. Modifications, penalties, or damage caused from fitment is not covered under our warranty conditions.
