

# Assembly Instructions

1. Dismantle the sections and lay on a hard, level surface.

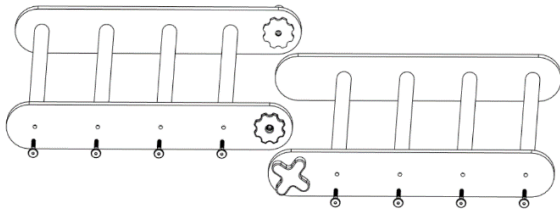

2. Attach the dowels to one side of the frame.

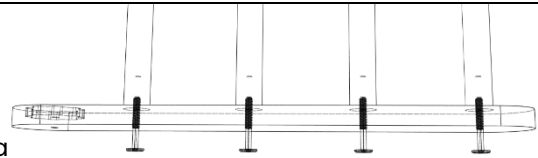

3. Attach the dowels to the opposing section as below.

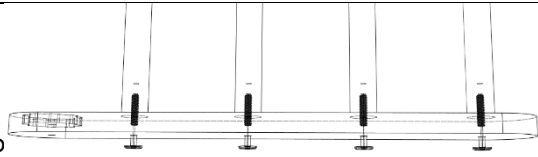

\*Take extra care during this stage and insert the screws slowly, gradually, and evenly.

3b

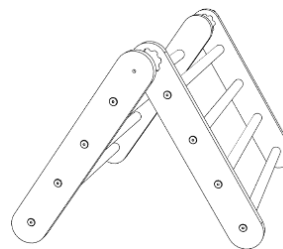

3c

4. Ensure that all sections of the frame are laying levelled with the floor/surface you are working on. If not – loosen the screws and twist the dowels until levelled and re-tighten.

5. Attach the frame in the desired angle.

6. Tighten the handwheels to secure the frame.
