

# A setup for every home

You are only two steps away from your smart heating solution.

## Step 1

Choose the Starter Kit you need.

### Starter Kit –

#### Wired Smart Thermostat V3+

You need the Starter Kit – Wired Smart Thermostat if your home has an existing wired thermostat with a combi boiler (i.e. no hot water tank).

### Starter Kit –

#### Wireless Smart Thermostat V3+

You need the Starter Kit - Wireless Smart Thermostat if your home has either a thermostat with a wireless connection to the boiler or no thermostat at all.

### Starter Kit –

#### Smart Radiator Thermostat V3+

For homes with a communal boiler or district heating that use radiators. Compatible with almost all Thermostatic Radiator Valves (TRV).

## Step 2

Choose your add-ons to suit your home.

### Add-on –

#### Wired Smart Thermostat

Add additional wired Smart Thermostats to your setup to control multiple rooms or zones individually.

### Add-on –

#### Wireless Temperature Sensor

The tado° Wireless Temperature Sensor measures and helps to reach the desired temperature by controlling the Smart Radiator Thermostats in the room.

### Add-ons –

#### Smart Radiator Thermostat

For Multi-Room Control. Available in Single, Duo, and Quattro Packs.

## AC or Heat Pump Control

### Smart AC Control V3+

The tado° Smart AC Control is compatible with ACs/air-to-air heat pumps with an infrared remote control with a display.

Internet Bridge

### Internet Bridge

Each Starter Kit comes with the Internet Bridge which plugs into your router and connects all tado° devices to the internet.

# Heat and cool intelligently with tado°

# Why tado°

Have every room at the right temperature, exactly when you need it. Save more energy and money.

## Save Money

Optimize your heating or cooling, while saving energy and costs.

## Puts you in control

tado° lets you control your heating or air conditioning anytime, from anywhere via the app.

## Works in every home

tado° works with all common heating systems as well as with most radiators, AC and heat pump manufacturers.

## Maximises comfort

tado° gives you insights into the temperature and humidity in your home.

## Perfect for smart homes

tado° lets you control your heating and AC with voice commands. It works with most smart home platforms including Google Assistant, Amazon Alexa and Apple HomeKit.

## Always up to date

tado° devices and the app are under constant development. This ensures that you always have access to the latest version.

## Quality you can rely on

tado° has specialised in developing smart solutions for climate control and has built up unrivalled expertise in this field. All tado° products are developed in Germany and promise quality that lasts.

# tado° App

Manage your home climate with your smartphone.

## Set individual schedules

With the Smart Schedule, tado° lets you plan your desired day and night time temperatures in time blocks based on your routine.

## Heat according to the weather

tado° takes local weather forecasts into account. It adjusts your heating and cooling accordingly to save energy.

## Breathe healthier

tado° helps you achieve a healthier indoor climate. It also gives you insights about the outdoor air quality and the current pollen forecast in your area.

## Never heat an empty home

Thanks to Geofencing, tado° notifies you to turn down your heating when no one is at home.

## Don't pay to heat or cool the neighborhood

tado° detects open windows and reminds you to turn your heating or AC off to save more energy.

## Get insightful reports

The tado° app gives you insights into how your indoor climate has changed over time and how much energy you've saved so far.

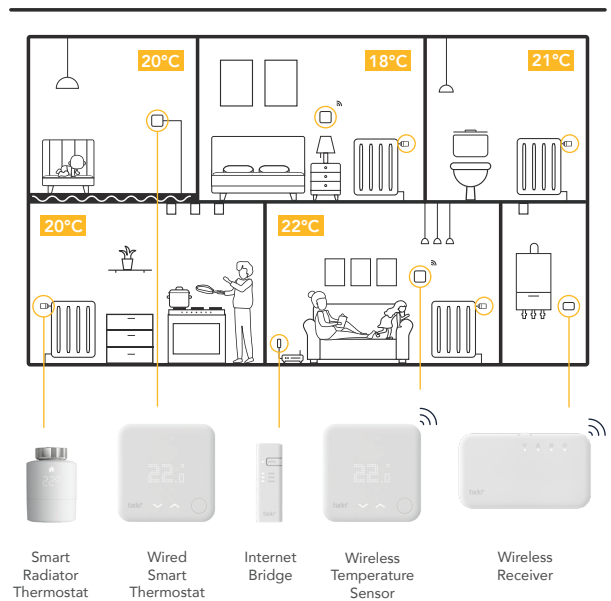

## Save energy effortlessly. With Auto-Assist

Lean back, get comfy and save energy! Enjoy fully-automated Geofencing and Open Window Detection with Auto-Assist (available in-app, €2.99/month, €24.99/year).

# Multi-Room Control

Control different rooms individually to maximize both your comfort and energy savings.

# Easy Installation

The installation couldn't be easier. We provide custom step-by-step installation instructions tailored to your heating system.

Compatible with 95% of all central heating systems. tado° can replace conventional room thermostats and can control central heating systems from all major manufacturers: Baxi, Glow-worm, Ideal, Potterton, Vaillant, Worcester Bosch, and many more.
