ABOUT VENTAIR

India's leading home and kitchen appliance brand, Ventair, established in 1999, is one of the largest Manufacturing company of Kitchen Chimneys in India making our products proudly MADE IN INDIA. An expert in auto clean kitchen chimneys, Ventair is a style statement.

Ventair is known for introducing innovative products all the time. From India's First 5th Generation Voice Enabled Chimneys, India's First Musical Kitchen Chimneys, India's First Smart Autoclean Chimneys and India's First Steam Auto Clean Chimneys to India's Revolutionary DIY RO Water Purifiers and RO Water Purifiers with Active Copper Technology and Antioxidant Herbal Filters, Ventair keeps designing and making remarkable products for you. To celebrate you. To take care of you.

Ventair's QC department undertakes the toughest quality checks which goes down to a screw thus ensuring defect free products in conformity of ISO 9001. Ventair's after sales service team are busy with the collection of advanced inspiration from our global customers so that each and every customer is guaranteed quality service whenever required. With superior quality, competitive price and excellent service, we whole heartedly welcome and look forward to you joining Ventair in our beautiful journey to create brilliance for every home.

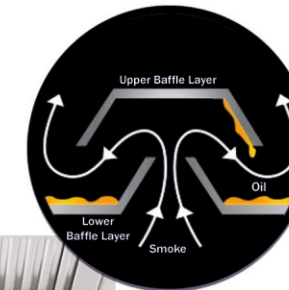

Ventair Chimneys come with super powerful, efficient and long-lasting heavy duty motor. They also has a very powerful blower fitted in a metal motor housing which increase its lifespan. The blower ensures quiet vibration-free working of the chimney in the long run. These factors boost reliability, quality and durability of our chimneys making them a low-maintenance product.

Ventair Chimneys come with 4 models of control - Voice, Motion Sensor, Touch Control and Push Button. For Voice mode, you can control your chimney with just a few commands and your Ventair Chimney will respond and react accordingly. For operating using motion sensor, wave your hands from left to right and vice versa to use the chimney. For Touch Control and Push Buttons, just touch/push the appropriate icons/buttons.

Ventair Chimneys are fitted with two energy-efficient LED lamps with minimal power consumption. This improves the kitchen lighting by brightening the area above your burner stove thus providing enhanced visibility while cooking. These LEDs are power saving and have a long life duration.

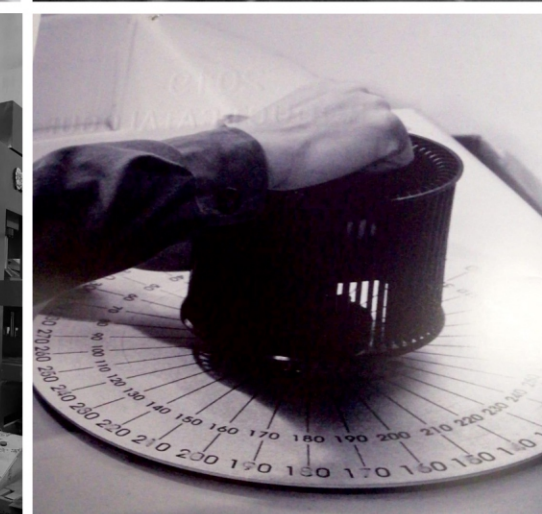

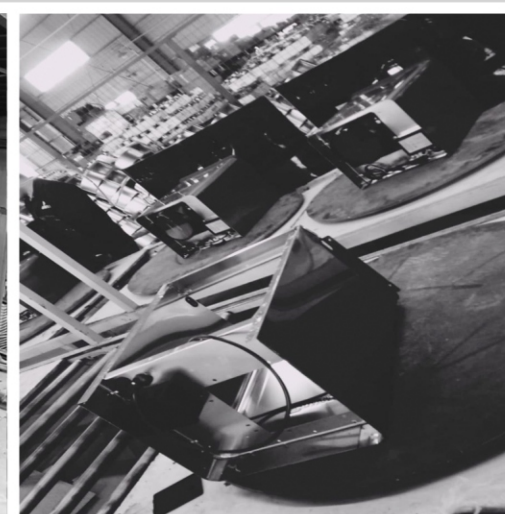

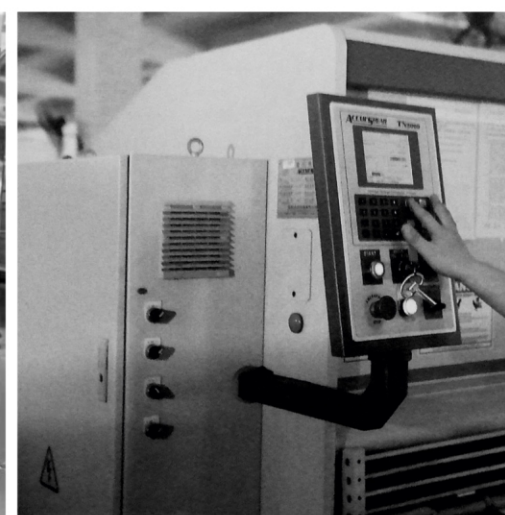

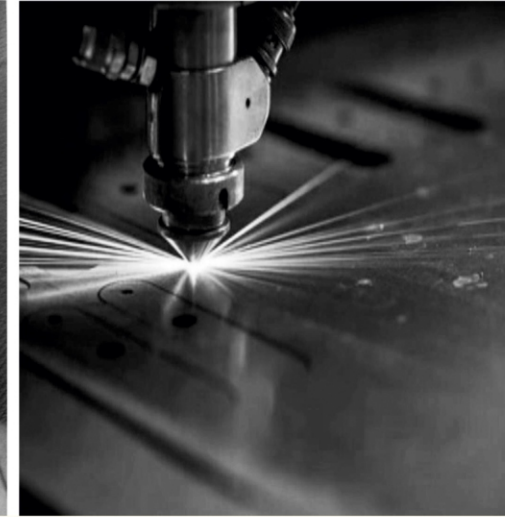

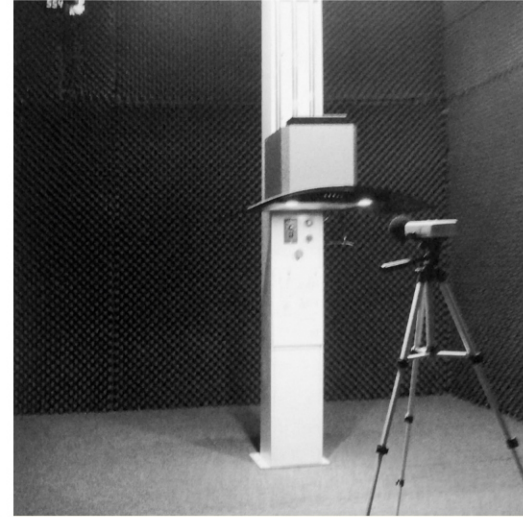

11° Baffle Filter

11° Filterless Filter

Ventair Chimneys come with 2 major types - Baffle Filters and Filterless. While the double layers of the Baffle Filter effectively traps the heavy oil and grease and are much effective as filters to prevent oil dripping on kitchen counters, filterless chimneys are much easier to clean. As per use, you can choose either of the 2 filters. Ventair has specially designed its filters so that they are inclined at an 11 degree angle which directs the oil and grime into the oil collector, thus preventing the oil from dripping on the kitchen surface. The 100% metallic oil collector is rust-free and strong. It is also detachable and easy to clean, thus reducing maintenance.

INDIA'S LARGEST KITCHEN CHIMNEY MANUFACTURER

Ventair is one of the largest Manufacturing company of Kitchen Chimneys in India making our products proudly MADE IN INDIA.

Ventair is proud to be the innovator of products. Our R&D Team is on the continuous lookout to make and develop efficient designs with latest technologies. We aim to make remarkable products for our customers that leave them in awe. Ventair is reputed for our quality and continuous innovation.

In our growing 58000 sq ft manufacturing unit in Kolkata, Ventair's QC department undertakes the toughest quality checks which goes down to a screw thus ensuring defect free products in conformity of ISO 9001.

ELECTRIC GEYSERS
BEE 4 STAR RATED

Ventair brings to you Premium Quality **4 Star Rated Electric Geysers**. With High Standard Glassline Tank in 6L, 10L, 15L and in 25L Storage Capacity. Ventair gives you the best electric geysers in India.

HOTSPRING 25L

- **FINISH**
Material : ABS Body (Rust and Shock Proof over the years)
- **CAPACITY**
Storage Capacity - 25L
- **FEATURES**
Glassline Tank for rust free performance
Magnesium Anode Rod
Temperature Control Knob
Energy Saving puf
Multi Function Valve
Thermal Cutout for Safety
High Pressure Working
High Precision Thermostat

OASIS 6L

- **FINISH**
Material : ABS Body (Rust and Shock Proof over the years)
- **FEATURES**
Glassline Tank for rust free performance
Magnesium Anode Rod
Temperature Control Knob
Energy Saving puf
Multi Function Valve
Thermal Cutout for Safety
High Pressure Working
High Precision Thermostat

HOTSPRING 10/15L

GAMMA

GAMMA DLX

TURBO

- **CAPACITY**
Storage Capacity - 3L/6L/10L/15L/25L
- **FEATURES**
Copper Heating Element
Energy Saving Insulation
Multi Function Valve
Thermal Cutout for Safety
