# ABOUT

SMALLrevolution is a start-up born out of UN's Development Goals. We are very engaged with goal 9 and 12 ensuring sustainable consumption and production patterns and partnerships.

Responding to the urgent global issue of plastic waste, SMALLrevolution wants to transform the plastic industry!

Few people know that plastic can be recycled 5-7 times and SMALLrevolution can give plastic those several lives!

SMALLrevolution works closely with the waste managers, the plastic industry, companies and designers in order to create radical circular and sustainable solutions to recycled plastic products.

We do not mix plastic types or add pigments or resin. This way, we ensure that our products can be recycled again when no longer a SMALLrevolution product.

As a champion of circular and sustainable design, SMALLrevolution's entire value chain is Danish. This means we only use plastic waste derived from Danish companies or households and our production facility is located in Central Denmark.

# FOR A SUSTAINABLE & CIRCULAR ECONOMY

## OUR FURNITURE LAST FOR GENERATIONS

All our products are made from recycled waste and be recycled up to 6 times. We give waste several lives.

## THEY ARE MULTI-FUNCTIONAL

Use them as a side table, display pedestal, a seat, in the garden, or by the pool.

## ROBUST MATERIAL

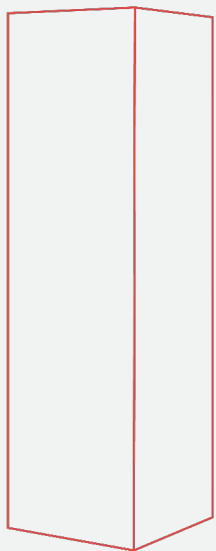

The smooth surface makes them easy to clean. They are robust for any kind of weather. They can take freezing degrees as well.

## TRANSPARENT MATERIAL

What you see is what you get! Each furniture has its own history, and each showcases a strong and sustainable statement.

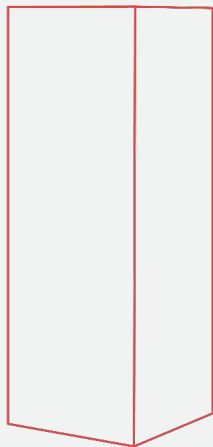

# OUR COLLECTION

**SIGRID 110**

*Podium*

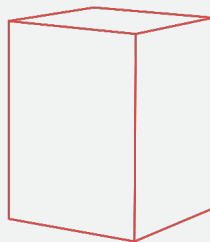

32 x 32 x 110cm  
12kg

**SIGRID 90**

*Podium*

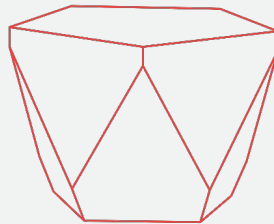

32 x 32 x 90cm  
8kg

*Podium / Side table*

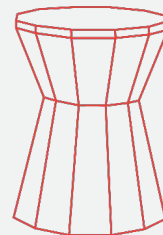

32 x 32 x 42cm  
4kg

**ANNIE TABLE**

*Stood / Side table*

55 x 55 x 40cm  
8kg

**MABEL**

*Stood / Side table*

33 x 33 x 42cm  
3kg

**DONNA**

*Vase*

20 x 38cm / 16,5ø  
2kg

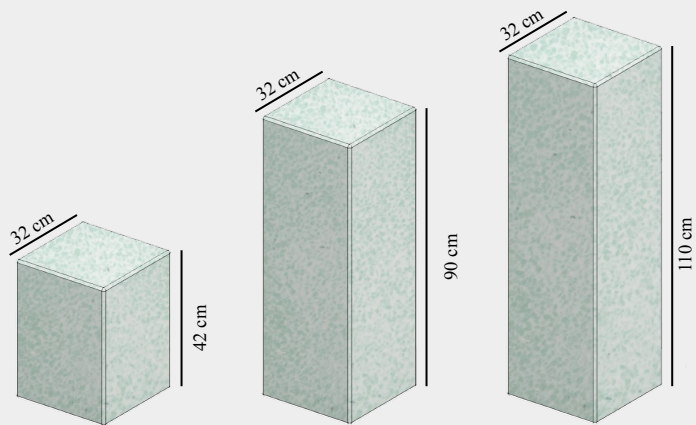

**WANGARI**

*Vase*

17 x 17 x 25cm  
1 kg

# SIGRID

## MATERIAL

The product is made from only one type of recycled plastic, polyethylene, to ensure that it can be recycled again and again. Sigrid is rotation-moulded in one piece and has a thickness of 50-100 mm. The material is UV-protected and weather resistant.

## SURFACE

The moulding cast is glass-blasted on the inside, which makes the surface matte and anti-slip.

## DIMENSIONS

Sigrid-42: 32x32x42 cm

Sigrid-90: 32x32x90 cm

Sigrid-110: 32x32x110 cm

## WEIGHT

Sigrid-42: 3-4 kg

Sigrid-90: 7-8 kg

Sigrid-110: 10-11 kg

## MOUNTING

Sigrid comes with a plug and can be filled with sand or mounted on the surface on the ground.

## MAINTENANCE

The surface is easy to clean and tolerates most detergents. No maintenance is required.

# ANNIE

55 cm

40 cm

## MATERIAL

The product is made from only one type of recycled plastic, polyethylene, to ensure that it can be recycled again and again. Annie is rotation moulded in one piece and has a thickness of 50-100 mm. The material is UV-protected and weather resistant.

## SURFACE

The moulding cast is glass-blasted on the inside, which makes the surface matte and anti-slip.

## DIMENSIONS

55x55x40 cm

## WEIGHT

7-8 kg

## MOUNTING

The product can be mounted on the surface, or with a metal anchor in concrete or soil. Another easier possibility is to fill it with sand through the hole in the bottom.

## MAINTENANCE

The surface is easy to clean and tolerates most detergents. No maintenance is required.

## CERTIFICATION

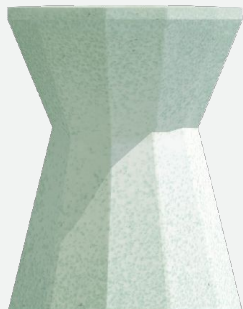

EN1176

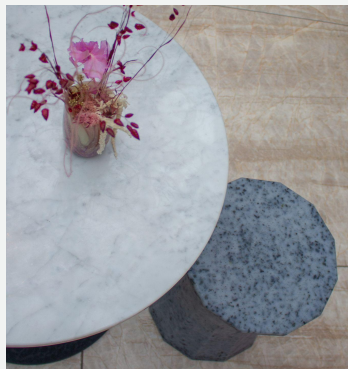

# MABEL

33 cm

42 cm

## **MATERIAL**

The product is made from only one type of recycled plastic, polyethylene, to ensure that it can be recycled again and again. Mabel is rotation moulded in one piece and has a thickness of 50-100 mm. The material is UV-protected and weather resistant.

## **SURFACE**

The moulding cast is glass-blasted on the inside, which makes the surface matte and anti-slip.

## **DIMENSIONS**

33x33x42 cm

## **WEIGHT**

3-4 kg

## **MOUNTING**

The product can be mounted on the surface, or with a metal anchor in concrete or soil. Another easier possibility is to fill it with sand through the hole in the bottom.

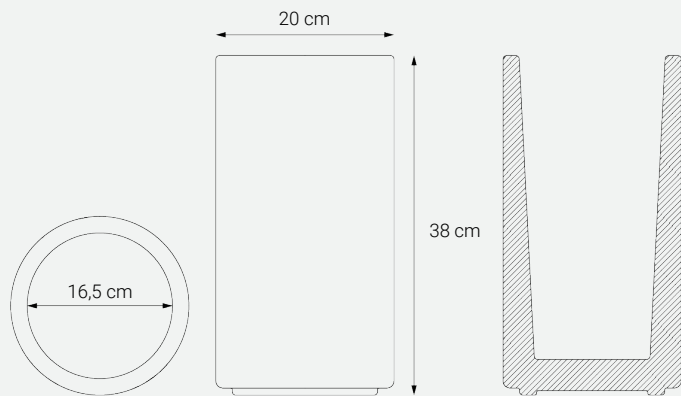

## **MAINTENANCE**

The surface is easy to clean and tolerates most detergents. No maintenance is required.

EN1176

# DONNA

25 CM

17 CM

## MATERIAL AND PRODUCTION

The product is made from only one type of recycled plastic, polyethylene. DONNA vase is rotational moulded. Designed for courageous and vivid flower bouquets.

## SURFACE

The moulding cast is glass-blasted on the inside, which makes the surface matte and anti-slip.

## DIMENSIONS

20x38cm / 16,5ø

## WEIGHT

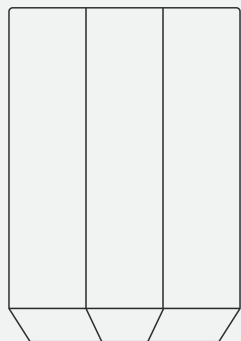

2 kg

## MAINTENANCE

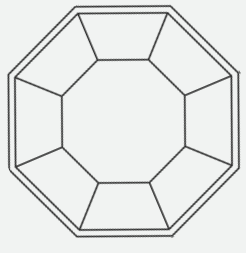

The surface is easy to clean and tolerates most detergents. No maintenance is required.

**SMALL**revolution

# WANGARI

25 cm

17 cm

## MATERIAL AND PRODUCTION

The product is made from only one type of recycled plastic, polyethylene. The Wangari vase is rotational moulded in one piece and has a thickness of 50-100 mm. The material is UV-protected and weather resistant.

Our production method takes less energy than common production methods such as ceramics, steel or aluminum.

## SURFACE

The moulding cast is glass-blasted on the inside, which makes the surface matte and anti-slip.

## DIMENSIONS

17x17x25 cm

## WEIGHT

1 kg

## MAINTENANCE

The surface is easy to clean and tolerates most detergents. No maintenance is required.

# OUR STANDARD COLOURS

WHAT YOU SEE IS WHAT YOU GET

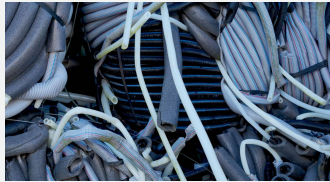

## 01\_TERRAZZO

Terrazzo is made from plastic containers, most of them household waste, such as cosmetic.

## 02\_WINTER

Winter is made from different plastic tubes and pipes.

## 03\_JADE

Jade is made from green containers, typically used for aluminium cans.

## 04\_WHITE

White is made from white medical injections.

# OUR STANDARD COLOURS

WHAT YOU SEE IS WHAT YOU GET

## 01\_MOSS

Moss is made from green trash containers .

## 02\_GLACIER

Glacier is made from blue gas pipes.

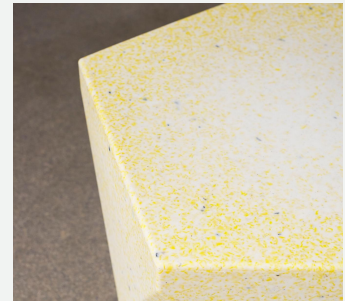

## 03\_PANTHER

Panther is made from industrial plastic tubes.

## 04\_CANARY

Canary is made from yellow gas tubes, usually buried in the ground.
