

110% Self Bunded **I-CUBE SERIES**

Suitable for the storage and dispensing of Diesel, Kerosene, Lubricants, Petrol and Waste Oil.

AT A GLANCE

- Self Bunded, Tank-in-Tank design – 5mm Inner tank / 5mm Outer tank.
- Self bunded tank capacity 110% of internal tank volume.
- Easily removable carbon steel inner tank for maintenance and cleaning
- S 355 JR material Internal/ External Tank and Wetted Parts.
- Also available in a 304 Stainless steel inner tank as optional.
- Design and Fabricated in accordance to AS1940 / AS1692 approved as self bunded tank for static storage
- Design and Fabricated in accordance to SANS 10131.
- Pumps / connections / hoses / meters / filters housed in bund, which can be locked even when in use!

DETAILS

- An inner tank contains the initial volume of liquid. In the unlikely event that this tank develops a leak the outer tank will prevent the liquid from escaping into the environment.
- All seams are welded to regulated standards.
- PETRO's I Cube self bunded tank is designed with an easy removable inner tank for maintenance and inspection.
- It's available in a range of capacities, ideal for static or relocatable by either truck or shipping container and suit most hydrocarbons storage requirements.
- The ultimate in quality at very affordable prices.
- 8000 L and above models are supplied with Overfill Protection Valve / Anti Syphon Valve and Overfill Alarm Unit.

STANDARD FIXTURES AND ACCESSORIES

- High level alarm.
- Fuel Suction line c/w isolation control with anti-siphon foot valve.
- Fuel Return Line c/w isolation control.
- Filler breather port.
- Vent with emergency vent.
- Bund dip.
- Safety decals.
- Colour is AS2700 "Colour Standards for General Purposes" N14 White.
