

## CRYSTAL CLEAR, HIGH GLOSS EPOXY RESIN FOR MULTI-PURPOSE APPLICATIONS.

		How to use Craftpoxy?
COMPOSITION	Solvent-free binder based on epoxy resin and amine hardener	1. If needed, it is a good practice to place the resin container into
NUMBER OF COMPONENTS	Two	hot water and hold for several minutes. The resin will loosen and become even more liquid, which will make it easier to work with, especially for the beginners. However, this step is not necessary.
APPLICATION	Universal epoxy resin used for art, crafts, coating & casting, fixtures, binding and more	2. Measure one dose of component A (resin) and add a respective amount of the component B (hardener). Mixing
BENEFITS	Excellent transparency, low– viscosity, self– levelling, easy to use, high pressure, abrasion and UV resistance	ratio is 1A : 0.27B – that means for every 100g of resin, you will need 27g of hardener.
		3. Gently mix for at least 2–3 minutes. You can add some
CHEMICAL RESISTANCE	To oil, grease, gasoline, certain solvents and weak acids	non-water-based paint to provide colour for your resin.
FULL MECHANICAL AND		4. Pour equally on the surface. One layer can be up to 40mm thick.
CAPACITY	Within 7 days	5. Keep the surface dry for 12 to 24 hours depending on the
		humidity and temperature in the room. You can use a heating gun or mechanical method to fix any
PULL-OFF	≥ 1,5 MPa	irregularities (if any).
		6. Enjoy your beautiful result and make sure to share it with us on our website, we love to see our
MIXING TIME	2 – 3 minutes	customers' creativity!
		Important:
CURRING TIME AT 20°C	24 hours	Our products always come in ready to mix ratios, however, to ensure maximum accuracy, we
		recommend using your own scales when measuring the
MIXING RATIO	1A: 0.27B	amouonts of resin and hardener.  If components are used in full – scaling is not necessary but
		remains recommended.
SINGLE LAYER THICKNESS	Up to 40mm	

## We would love to hear from you!

You are always welcome to reach out to us on our website, email or social media with any questions, suggestions, or feedback. Your opinion helps us improve our small business and inspires to progress in creating superior value to our customers. Therefore, consider coming back to us and leaving a feedback – it is greatly appreciated!

Thank You for choosing Craftpoxy!
