

12MVP-FP (HTR-CR) - 13 mm

13 mm MVP-FP Self Regulating Heating Cable for non-hazardous area with fluoropolymer jacket

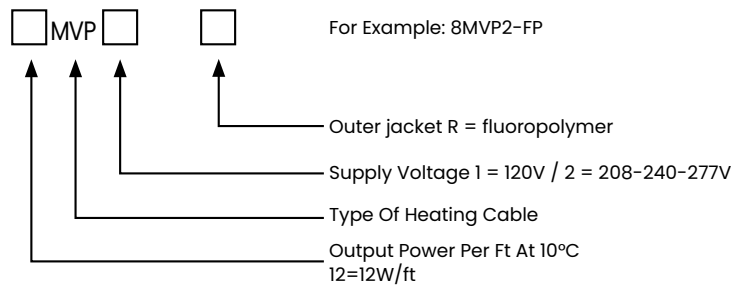

MVP-TP cables are ideal for roof & gutter de-icing and help prevent ice damage caused by ice dams. They promote free flow of melt water through gutters and downspouts to ground level and drains, for residential and commercial applications. These cables use the latest self-regulating technology adjusting heat output according to the temperature, making them energy efficient and cost effective.

- Cable can be cut to desired length and overlapped without risk of overheating.
- Suitable for metal or plastic surfaces.
- Low installation and maintenance cost.
- Tinned copper braid provides additional protection to the cable core.
- Flame retardant thermoplastic outer jacket option, protects against certain chemical solution, abrasion and impact damage.
