16 shades whiter!

Whitening results measured using the GLO Science VITA Motivational Shade Guide, arranged in light to dark order.

GLO Science Professional Doctor Testimonials

"Love GLO!!! I've tried many other whitening products and experienced sensitivity, but I haven't had any sensitivity with my GLO! Super easy, tastes great, and the results are remarkable. I've used the product since it first came out and I still love it to this day. You're never fully dressed without a GLOing smile!!"

-Dr. Dayna Cassandra, Paramus, NJ

"We've been using the GLO system for over the past 6 months now and everybody is loving it! It's quick, efficient and delivers fantastic results with minimal sensitivity issues.It's also a great looking product. As a result, we're now doing more whitening cases than ever before."

-Mitch Levitt DDS, Los Angeles, CA

"GLO has given us the unique opportunity to bring a superior whitening product to our patients with sensitive teeth. They can now enjoy a brilliant white smile, painlessly and at a very affordable price. And they love the touch up pen and lip care!!!"

-Monroe Dental Office, Monroe, NY

"We love the convenience of GLO Science PRO to Go. Our patients can whiten anywhere without the mess of strips or trays. The G-Vials are easy to use and the brush tip gets in between the teeth, whitening those hard-to-reach areas. We always tell our patients to use it in the car on their way to work - it brightens their teeth right up after that morning cup of coffee!"

-Dr. Stefano Grasso and Dr. Allison Corapi Splendid Smiles Jackson, NJ

"GLO does what it promises; it delivers reliable results and an average of 8-10 shades lighter. I found that unlike most whiteners in the market, this is the first one that all my patients had NO sensitivity during and after the treatment. The innovation of having a personal GLO light device for each patient, makes GLO unique. The packaging is outstanding.... it's the "Apple" of whitening. We don't usually see a lot of originality behind the development of over-the-counter whitening products, but GLO certainly beats all the standards."

-Dr. Sandra Garcia Martin, Bow Lane Dental Group, UK
