

HW dowel drill with centre point

Without back guidance, 10 mm cylindrical shank

51010

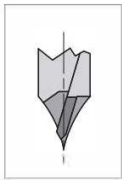

APPLICATION:

Applied in chucks, reducing sleeves etc., on dowel drilling machines. Used for drilling blind holes in solid wood, wood-based material etc., including coated material.

DESIGN:

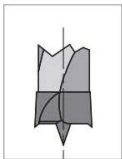

Carbide cutting head with centre point, two knives and negatively ground spurs. Enlarged back clearance angle. Spiral part plastic coated. Cylindrical shank with clamping surface and depth adjustment screw.

D mm	L2 mm	L1 mm	Shank mm	rhs/lhs	Order No.
------	-------	-------	----------	---------	-----------

Negatively ground spurs for improved edge quality of the bore hole and longer tool service life.

5,0	35	70,0	10x30	rhs	10022479
-----	----	------	-------	-----	----------

Enlarged back clearance angle for reduced strain and improved chip ejection.
