SALTY IS A FEELING.

It's getting wild on the ocean, the sea spray all over our faces.

It's part of who you become when you're out there, lost with friends.

It's the salt encrusted in us after a long day playing with the waves.

After shower the salt is gone, but the feeling stays there.

OUR STORY

S

STAY SALTY

A

We are a French family-business which develops Kiteboarding gear for demanding riders.

We believe that the product is the heart of a company, and as a result most of our efforts are spent on the research, development and testing of the collection.

Our passion is about Kiteboarding as much as it is about creating and innovating, we enjoy both the hours spent at the office and the ones spent on the water.

“ We have been into Kiteboarding since the beginning. ”

All over these years, we have seen how Kiteboarding evolved and how many people were hit by this passion. Today it's pure happiness to see all those guys & girls on the water with a big smile on their faces.

MANERA is meant to enable those people to make the most of their time in the ocean. We create products so nobody has to get out of the water because they are cold or uncomfortable.

BECAUSE WE BELIEVE EVERY MOMENT OUT THERE SHOULD BE A GREAT ONE.

KEY FEATURES

WARMTH & COMFORT

Our suits are directly designed on a model adopting a Kiteboarding specific position, for a much more natural feeling while riding.

NEOPRENE

- 1** **RE-FLEX SKIN**
 - Best stretch of the market
 - Durable: Tear resistant, UV resistant
- 2** **AIRFOAM NEOPRENE**
 - Made to be light, improving comfort & endurance
 - Best flex & insulation on the market
 - Quilted touch
- 3** **MAGMA FLEECE**
 - Plush loops work as insulators & heat generators
 - Smooth, soft & comfy feeling against the skin
 - Dries fast

- Triple glued / Blind stitched / Inside tape welded by an air heater machine
- Durable & Flex
- 100% waterproof

- Keep the water away
- Keep legs & arms panels in place

- Helps the neoprene to bend more naturally
- Greater comfort during flexion

- Drains the water out of the leg
- Continue the session in the best possible conditions

COLLECTION **ECLIPSE**
HARNESSES

HARNESSES

KEY FEATURES

SUPPORT & ADAPTABILITY

Having worked on ergonomic designs for a while, our goal was to push our frame concept to more stiffness, allowing a better support of the back & a lower fit.

But something 100% hard was not an option: Our back needs some adaptability & human morphology is unique.

So here comes the ECLIPSE, a skilful balance between stiffness & flex that brings support where you need it and the freedom to move the way you want.

1 ADAPTIVE SHELL

- The Adaptive Shell stiffness shades from hard in the center area to softer on the edges
- The stiff center-belt prevents the harness from folding and compressing your body while preserving a good lumbar support
- The softer outline preserves intuitive mobility and adaptability
- It results in a shell that is forgiving where you need flex and stiff where you want support

2

- The gel foam disperses pressure evenly & efficiently to provide a "pillow comfort", much appreciated during long sessions
- It creates a different sense of feeling while riding as it moves along with your movements, therefore the contact with the harness is more intuitive & it prevents any rash or rubbing discomfort

↑ SPREADER BAR SYSTEM

- Length of our bars are well suited so they will pull along both sides of the harness
- Avoids any lateral contraction on the body

TUCK FLAP»

- Flaps are inserted into the harness, they are compressed and locked when straps are tighten
- Stiffen the connection between spreader bar & harness & prevent it from riding up

△ DOWN HOLD SYSTEM

- The spreader bar has an asymmetrical attachment that distributes the forces downward.
- Secured in its original position, the hook does not ride back up

HARNES

KEY FEATURES

ENERGY DISPERSION
& COMFORT

HIGH PRESSURE | LOW PRESSURE

1 ENERGY DISPERSION FRAME

- Developed in close collaboration with a kinetic science lab to optimize load distribution.
- Avoids any unwanted muscular efforts to offset the bad traction
- Raised durability because the loads are not spread through soft parts

3 BALLISTIC NYLON

- Developed for the Royal Air Force during WWII
- Made of thick nylon threads
- Outstanding abrasion resistance, extreme durability

2

- Thermoformed one-piece foam backing
- Much lighter than multiple foam layups used in some harnesses
- More durable as there are less parts to be glued or stitched together

↑ SPREADER BAR SYSTEM

- Length of our bars are well suited so they will pull along both sides of the harness
- Avoids any lateral contraction on the body

TUCK FLAP

- Flaps are inserted into the harness, they are compressed and locked when straps are tighten
- Stiffen the connection between spreader bar & harness & prevent it from riding up

MANERA LEASH RELEASE

- Trigger the leashes easily with left or right hand
- Leash can be slideable or clamped between the two rings

DOWN HOLD SYSTEM

- The spreader bar has an asymmetrical attachment that distributes the forces downward.
- Secured in its original position, the hook does not ride back up

HIGH PRESSURE | LOW PRESSURE

1

- Receives 100% of the kite power and spreads it smoothly around the back
- Avoids any unwanted muscular efforts to offset the bad traction
- Raised durability because the loads are not spread through soft parts

2

- Weighting in at just 1.1kg (Size M. No spreader bar)
- One of the lightest harness on the market
- Doesn't absorb water: Stays light while riding

3

- Thermoformed one-piece foam backing
- Much lighter than multiple foam layups used in some harnesses
- More durable as there are less parts to be glued or stitched together

- Length of our bars are well suited so they will pull along both sides of the harness

BOARD BAGS

20
19

KEY FEATURES

WITHSTANDS & PROTECTS

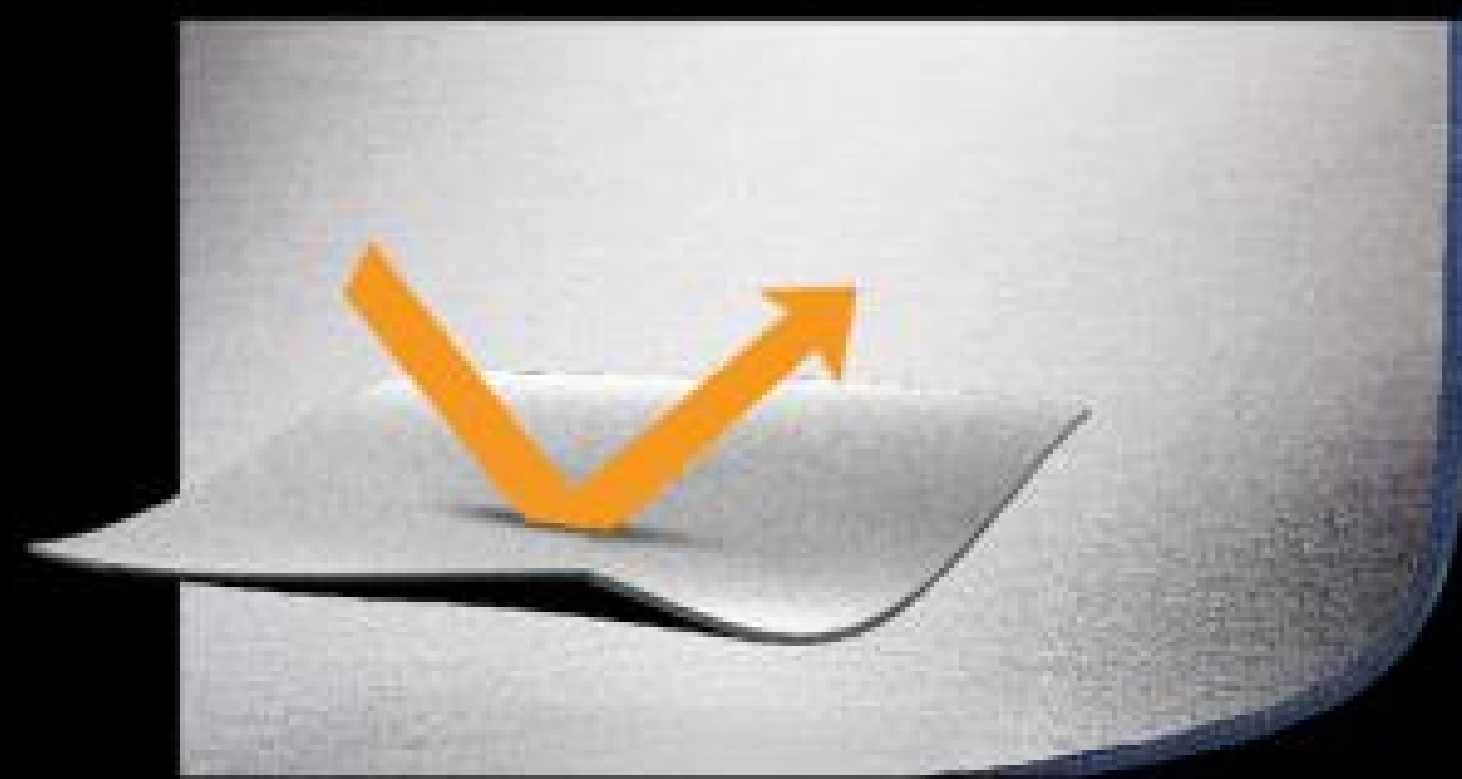

1

- Offers durability and waterproofness
- Its soft and technical style make the design aesthetic and modern

2

- Highest grade of polyester 600D
- Our boardbags will withstand many trips

- The ALU layer is a reflecting material that is very resistant to tearing and shocks
- It reflects UV rays & regulates the temperature of your boardbag surface

- Lets the boardbag breathe
- Evacuate moisture and bad smells

- The whole outline of the boardbag is stitched with two gallons instead of one, which enhances durability
- Our bags are stitched following a rigorous process to ensure the best quality

- Some parts of the boardbag are sensible and are often dragged on the ground
- PVC patch protection is the most resistant surface we could use to protect these

COLORS.	FULL BLACK

FEATURES

Gloves are made of a **Glideskin** material that is very water & windproof. The glove is pre-shaped for an optimal comfort & the palm is printed to be able to stick better to the bar/board/paddle. Cuffs are waterproof & Inside MAGMA material keeps you warm even in the worst conditions.

PONCHO

COLLECTION

DETAILS

REF.	M-PONCHO
SIZING.	ONE SIZE
COLORS.	GRIZZLY / DARK NAVY

FEATURES

We chose **bamboo fabric** for mainly two reasons: The **Bamboo material** has many great characteristics:

- Ultra soft feeling
- Absorbs water three to four times better than a regular cotton
- Dries twice as fast as other materials
- Naturally bacteriostatic
- Naturally hypo-allergenic

This is the **perfect accessory to change** before and after riding, plus it will get you warm and dry in a minute. Poncho is a widely used product, but we've been looking for a **warmer, softer, cleaner and greener product.**

AND A REDUCED IMPACT ON EARTH

- Grows without fertilizers and pesticides.
- Bamboo farming needs four times less water than cotton.
- Absorbs 30% more CO2 than a tree, creates 30% more oxygen.
- Prevents deforestation: Can grow 1 meter per day.
- Prevents erosion because of its long roots.

BLIZZARD

KITEBOARDING JACKET

TECHNOLOGIES

DETAILS

REF.	M-BLIZ
SIZING.	S-M-L-XL
COLORS.	SAILOR BLUE

FEATURES

Winter is all about strong wind & colds days, this is exactly what the Blizzard jacket is made for.

This 3 layers vest is light, waterproof & windproof. The two side-pockets let the spreaderbar go through to be used when Kiting. Its breathability makes it a good tool to go SUPing, biking, or even wear it in the street.

The Blizzard jacket creates a cocoon around the Kiter that allows a far better resistance to cold even with a standard wetsuit.

Whether you are on the water or debriefing the session on the beach, the Blizzard will keep you warm & comfy.

WETSHIRT

COLLECTION

DETAILS

REF.	M-WETSHIRT

LEASHES

COLLECTION

DETAILS

REF. **M-LEASH**

COLORS. BLACK
/ YELLOW / RED / BLUE / WHITE

FEATURES

PREMIUM MATERIAL & LONG-LASTING TESTING

We have been working with many partners until we found the quality we had been looking for and this leash is made out of the strongest materials on the market. Our Kite, SUP & Surf team has been testing it for two years, and the feedback is that you can rely on this leash in any conditions.

OPTIMUM COMFORT

For a better comfort we used high quality, very soft neoprene when building the cuff, while an extra 2mm thick cell foam layer is built-in to achieve give a pillow-like feeling.

FULL COLOR MATCHED

100% full matched colors, from the tube to the cuff, even the short cord attached to the rail saver.
