INTRODUCTION

Thank you for purchasing **Mood Guitars**!

Mood Guitars is the first of our Boutique series which is focused on niche and unique takes on musical instruments. We realized there weren't many options for the modern producer and composer when it came to chill, lofi, and moody playable guitars.

Instead of sampling guitar loops, we wanted to put the power in your hands with this flexible library, giving you the tools you need to write emotional progressions, soaring guitar melodies, and ambient guitar textures. This library comes with 5 multi-sampled guitars: a Vintage Telecaster, a modern Stratocaster, a full-bodied Fender Precision Bass, a warm Acoustic Gibson J-185 EC, and an Orpheus Valley Solea SA-C Nylon all backed a minimal and lofi effects engine.
