CANDLE SHACK

DESCRIPTION

INGREDIENTS FOR EACH CANDLE

1x 9cl glass jar
7.5g of Blueberry and Vanilla Fragrance Oil
67.5g Candle Shack Ecosystem RS1
1x V6 Wick
1x 15mm Adhesive Wick Pad
1x WickClaw Tool for 9cl Glass

WAX

Candle Shack's EcoSystem RS1 Wax is a natural wax blend made from rapeseed and soy oils. Developed exclusively for Candle Shack, this professional-grade wax is easy to use by novice and seasoned chandler alike and is particularly popular with our luxury clients. This plant wax is also easy to wick and offers good scent throw with compatible fragrances.

VESSEL

Our Lauren 9cl Votive glass is manufactured in Italy and meets the highest standards of clarity and tolerance.

Height: 67mm

Diameter: 56mm

Internal height: 57mm

WICK

Highly engineered Wedo V candle wicks can handle complex perfumes and dyes thanks to their coreless construction. The ring-spun cotton threads with a metal powder help reduce and even eliminate carbon deposit formation or wick disintegration. All wicks are 110mm long with a thin paraffin wax coating for stability.

USAGE RECOMMENDATIONS

- We recommend heating RS1 to a maximum of 75°C (slowly to prevent damaging the wax).
- Add the fragrance at 63°C and stir for 60 seconds.
- The mixture is ready to pour at 60°C into glasses at room temperature.
- If the top is uneven once set, you can flash the surface with a heat gun or do a top-up pour to get a clean finish.
- Leave the candle to cure for at least 2 days for the best results.

DISCLAIMER

Each report shows test results for a set of candles made by Candle Shack's R&D team for that particular recipe. The test reports are not a guarantee that all candles made to the recipe will burn in exactly the same way. Variables such as ambient temperature, air flow, or the manufacturing process can affect the burning profile of a candle, so it is recommended that candle makers conduct their own testing to ensure that they are satisfied with the performance of their product.
