

# DAISY 3-WICK CANDLE RECIPE WITH DARK MASQUERADE

# CANDLE SHACK

## WHAT YOU WILL NEED

<a href="#">1x Wax Melt Mould - Daisy</a>
<a href="#">1x 64cl Candle Jar</a>
<a href="#">54g Dark Masquerade Fragrance Oil</a>
<a href="#">3x Stabilo 3 Wicks</a>
<a href="#">3x Adhesive Wick Pads</a>
<a href="#">6x 40mm x 25mm Wick Cores</a>
<a href="#">540g Golden Wax 464</a>
<a href="#">20g Golden Wax 494</a>
<a href="#">0.307g Bekro Dye - 5700/10 - Gold Yellow</a>

# THE STEP-BY-STEP INSTRUCTIONS

<b>STEP 1</b> Melt 20g of Golden Wax 494 in the double boiler or place the wax in a microwaveable jug and microwave it in 10 seconds intervals until fully melted. Separate 5g of the wax and add a pinch of yellow dye. Stir the wax to ensure that it is fully combined. Use a pipette to colour the centre of the flowers and leave them to set for 5min.	<b>STEP 10</b> Wipe your pouring jug clean with a dry cloth to remove residual wax – don't wash the pouring jug with water as wax and water don't mix! You will be re-using the jug for each of the layers.
<b>STEP 2</b> Once the middle of the flowers is set, pour the rest of the melted wax to fill all the flowers. Leave to set for 20-30 min and gently demould. If some flowers break, repeat the steps.	<b>STEP 11</b> Repeat steps 5-10 using 0.09g of dye for the second layer.
<b>STEP 3</b> Fix the sticky pads to the metal sustainers on each of the three wicks. Peel off the backing strips and stick the wicks to the bottom of the candle glass in a triangular fashion, about 15mm away from the edge of the glass.	<b>STEP 12</b> Repeat steps 5-10 using 0.045g of dye for the third layer.
<b>STEP 4</b> Gently thread each wick through one wax core, ensuring the hollowed end of the core is facing downwards. Try not to kink the wick. Slide the wick cores to the bottom of the wicks and allow them to sit loosely in this position.	<b>STEP 13</b> When the third layer has set, thread the wicks through a second wax core. This time, the flat end should be facing downwards.
<b>STEP 5</b> Melt 90g of Golden Wax 464 by placing the wax in a microwaveable jug and microwaving it for 120-150 seconds or using a double boiler. Stir the wax to ensure that it is fully melted. If the wax hasn't fully melted, microwave it in additional 10 seconds intervals.	<b>STEP 14</b> Repeat steps 5-10 using 0.022g of dye for the fourth layer.
<b>STEP 6</b> Add 0.135g of yellow dye 5700/10. Stir the wax with the dye until fully combined.	<b>STEP 15</b> Repeat steps 5-10 using 0.011g of dye for the fifth layer.
<b>STEP 7</b> Add 9g of fragrance oil to the melted wax and stir for 30 seconds.	<b>STEP 16</b> Repeat steps 5-10 using NO dye at all. This sixth layer will be white. Remember to allow the wax to set for 45 minutes between each colour!
<b>STEP 8</b> Gently pour the perfumed wax into the centre of the candle between the three wax cores, ensuring that you do not splash wax onto the side of the container.	<b>STEP 17</b> Once the top layer is still soft, carefully place the flowers on the top of your candle in the desired pattern and press softly so the flowers stick to the surface.
<b>STEP 9</b> Before the wax begins to set, press each wick core down firmly, ensuring that the hollowed space fits snugly over the wick sustainer. Straighten the wick core to ensure they are vertical using a wick claw. Allow to set for 45 minutes.	<b>STEP 18</b> Allow your candle to set at room temperature for at least 48 hours. Trim the wicks using sharp scissors to 5mm.
	<b>STEP 19</b> Light and enjoy your candle!
