

Holiday Cheat Sheet: Moms & Littles Edition

This holiday, get by with a little help from our gift guide, curated for the new moms, babies, and the little kids on your list.

For the mom always on the run

JEEP HYDRO SPORT PLUS JOGGING STROLLER

Splurge alert: If you know a parent who lives to run but is having a hard time fitting it in post-baby, this gift will be a godsend. Winner of multiple 'best' jogging stroller awards this year, this one covers all the bases—its super smooth suspension is designed to reduce bumps for your little one, an adjustable handlebar gives you ergonomic control, it reclines enough to invite sweet, sweet naps, and best of all (besides the whole cardio and fresh air part), it folds up nice and compact for car or apartment. Also pretty cool—there's a car seat adapter that can accommodate certain baby seats to make this a full blown travel system. Do yourself a favor and do a little gifting recon before investing in this though—make sure mama isn't going to interpret this gift as a hint to lose the baby weight.
