

DAILY MOM

THE BEST SUMMER & FALL OUTDOOR GEAR FOR FAMILIES

DELTA CHILDREN

If there is one thing you need this summer when traveling with children, it's a stroller. And if you have multiple kids, it must be a double stroller. Whether you are on vacation, running errands, or enjoying an outdoor event, the [Jeep Destination Side X Side Double Stroller](#) is going to be one of your most-used gear items this summer. This versatile stroller holds 2 children up to 80 pounds in total along with any extra gear in the underneath storage area.

Although this is a double stroller, it is surprisingly lightweight and can be folded into a flat, compact size and easily carried with the convenient carry strap. With the swivel front wheels and one step brakes, parents can easily maneuver through various types of locations and terrains and even through standard doorways. The two swivel child bars not only offers protection for children but also allows them to easily get children in and out.

Parents will be able to keep their kids contained and safe in a reliable stroller while children have a comfortable and smooth ride. Reclining seats, adjustable footrests, and UPF sun protection canopies are just a few of the features that make this such a quality stroller option for families. The bottom line is, kids get tired and hot when walking long distances and just can't keep up with adults. The [Jeep Destination Side X Side Double Stroller](#) is a lifesaver for both children and parents.
