Shopping for baby furniture is always a challenge, but baby dressers are particularly difficult. You want something appropriate for when your baby is small; but because babies grow at a rapid pace, it also needs to work for larger children. Plus, some people like their dresser to also serve as a baby changing station. I know I did.

Then, there are the concerns about quality, durability, child safety, and price. Don't worry. I've taken all of those factors into consideration to select the very best baby dressers available. Here's my list.
