

## Delta Children's Little Folks Strollers

by Kim Alsumiri

Delta Children, a family run company, is well known for their children's furniture because of the quality and innovation that goes into every piece. Now, the name parents have come to trust for their home can travel with them and their baby with the Little Folks stroller collection that is exclusively at Walmart. There are 6 strollers in the Little Folks by Delta Children collection, including a double stroller, making sure there is something for everyone. With prices that start at \$59, there is also a price point that can match any budget without compromising for quality.

The Little Folks Rubix Reversible Handle Stroller is a top of the line stroller without an obscene price tag (right now it is on Rollback at Walmart.com for under \$100, so rush over!). The dark tweed design is stylish and makes it easy for any gender, so it can be passed down to the next baby in your family or group of friends. It is compatible with a number of infant carseats (Greco Snug Ride, Click Connect 30, 35, 40, Evenfall Nurture, Evenfall Embrace). As the baby grows and can sit unassisted, the stroller can be used for forward facing or, thanks to the reversible handle, baby can watch mom or dad while taking a stroll. There is a full canopy that provides impressive 50+ SPF coverage. The seat has three positions for desired reclining, and the Rubix has an adjustable footrest and removable tray with cup holder. I appreciate the cupholder so the bottle doesn't keep bouncing off or falling over when strolling. The stroller is good for kids up to 50lbs, so it is guaranteed to last for a few years at least.

The stroller has a five point safety harness with padded straps and reflective piping, making it safe for later evening walks and you can still be seen. The front wheels swivel, but also can be locked into position. The rear wheels are an inch larger and are great for bumpier rides. There is an easy one pedal brake that controls the front and back wheels all in one. The stroller is light weight for its size and is only 20.9lbs. The stroller is easily assembled and took me less than 10 minutes to set the whole thing up. It also folds easily for storage or putting in the car. Delta Children Little Folks also boasts that 1 out of 2 kids sleep in their products, and I can vouch for that! Our daughter, who is not the best sleeper, likes napping in the stroller, so we end up keeping it in the living room because she prefers that to her crib for naps. For a stylish, sturdy, and quality stroller, check out the Little Folks line at Walmart:
