# Delta Children The Clutch Stroller

Maybe it takes a furniture company to make an eminently packable stroller. If so, Delta Children did it with its Clutch Stroller. Tipping the scales at 11.7 pounds, it's feather-light compared to others its size, and unless you see it folded up, it's hard to imagine something so robust collapsing into a six-by-15-by-20-inch package. Whether you're headed across or out of town, smaller is clearly better.
