

The Best Baby Strollers of 2020

Best baby stroller for storage

Jeep North Star Stroller

[SHOP NOW AT AMAZON](#)

Price: \$

Even if you live in a larger home, you probably don't want your entryway or garage cluttered with your baby stroller.

Why we chose it: The Jeep North Star Stroller is an excellent storage solution because it folds into slim dimensions (44 inches long, 11.5 inches wide, and 7.75 inches deep) and less than 12 pounds, making it easy to maneuver whether folded or assembled.

On top of having a cup holder and storage basket, parents like that the padded seats can be rolled back during warmer weather to expose a mesh seat for much-needed airflow. The canopy and sun visor can also be extended to give baby extra protection.

Considerations: However, whereas most strollers are rated for up to 50 pounds, this Jeep model is rated for up to 40 pounds — something to consider if you're looking for a stroller that will grow with your baby.
