

Get Inspired with These Kids Twin Loft Bed Ideas

Design Ideas Using Loft Beds

You can let your imagination run wild when it comes to organizing your child's room and working with that free space underneath the bed. If you're not sure where to go from there, here are some ideas to help you get started.

4. Twin Loft Bed

Our next suggestion is a Twin loft bed made by [Delta Children](#), a brand with experience in making some pretty neat beds for kids. This one is made from solid wood and measures 53.5" H x 41.5" W x 77.6" L, with 37 inches of clearance underneath the bed. It has a non-slip ladder which should be easy to climb if your child is at least 5 or 6 years of age. The guardrails run across the entire length of the bed, which is a pretty common feature in these kinds of beds. It doesn't come with any extras, so you get to choose how you put the space underneath the bed to good use.
