## The Best Desks for Kids, from \$10 to \$900

For many families, September is going to look, uh, a little different this year. And if you're one of the families whose [back-to-school plan](#) involves partially- or fully-remote learning, your child is going to need a workspace where they can focus...and keep all their stuff off your kitchen counter. (Because we all remember how much fun *that* was last spring.) Here, the 11 best desks for kids of all ages, starting from just \$10.

#### 4. DELTA CHILDREN CHAIR DESK WITH STORAGE BIN

##### Best for Toddlers

She always wants to get in on the action with her older siblings, and that includes when they go to school. So while she doesn't necessarily *need* a desk, she'll appreciate being able to color or play alongside them—especially once she sees the cute Peppa Pig design on this one. Not into Peppa? Check out the other available characters like Mickey Mouse, the Lion King and Catboy. We especially love the built-in cup holder and the pull out storage bin underneath the seat (because we could *always* use more storage). Recommended for ages three and up, this one measures 23 inches wide.
