VERDICT

Overall, this is a sturdy stroller for the price. The wheels aren't the biggest, nor are the seating compartments. However, you can add on some mosquito netting to keep bugs off your youngsters, and you have a lot of storage even though this is a double stroller. **J is for Jeep Brand Scout double stroller** is still a great stroller to take on family outings to the zoo, park, lake or nature trail. On the other hand, this stroller provides decent, basic transportation for walking the mall, grocery shopping and walking to school to pick up older children.

Wheels

Every wheel is 5 ½ inches wide in the front and back. The front wheels swivel and have a suspension system to handle any kind of terrain at the front of the stroller. This stroller has six sets of wheels, or 12 total, to keep everyone's weight balanced.

Capacity

Each seat holds up to 35 pounds, so you have 70 pounds between both children. The manufacturer recommends the stroller for infants up to 35 pounds, but your children may reach the walking stage before they get to 35 pounds. That makes this stroller perfect for days when your youngsters just need a break from walking.

Fits through standard doorways

The stroller fits through standard, 30-inch doorways, so that means you can take this stroller anywhere you need to go. Think school, the store, church and more.

Seats

The seats have multiple positions, from sitting up straight to reclining backwards. Your kids get to see what's in front of them or lay down for a nap, depending on their needs. This stroller is ideal for taking your kids out for a walk ahead of their afternoon nap time or sleep time.
