6.5" H x 10.5" diameter | Salvaged Wood from Eagle Creek Wildfire | \$500

This bowl's form is reminiscent of the many species of lily native to the Columbia Gorge. A salvor left an entire root burl from the Eagle Creek Fire in my driveway in the fall of 2018, over a year after the fire, another of many acts that inspired this project.

Salvaged Wood from Holiday Farm Fire & African Blackwood

We typically think of timber as being grounded in just one place, yet it often comes to the woodturner from the other side of the world, as with the African Blackwood finial I made for this piece.

## **Snag**

Tom Willing

16" H x 7" base diameter | Salvaged Wood from Riverside Wildfire | \$400

Perversely, fires often burn through quickly, leaving many trees still standing on the stump, branchless, dead but enduring against the lesser elements of earth and wind. This piece is from the area of the Riverside Fire.

## Hollow Form I

Tom Willing

6" H x 10" diameter | Salvaged Wood from Eagle  
Creek Wildfire | \$500

A woodturner commences a conversation with every piece of timber mounted to a lathe. Sometimes in that process formality and intention take on different meanings.
