

TOPBUXUS[®]

Topbuxus Grow was developed by Europe's largest Buxus grower for superior Buxus growth. It helps with nutrient deficiencies in all varieties of Buxus and uses the same fertiliser formula that is used and trusted by professional growers!

Topbuxus Grow is an all season fast acting granular Buxus fertiliser that contains all the essential nutrients needed to promote a healthy root system and ensure strong growth and intense deep green leaves.

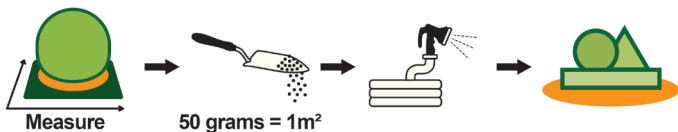

Topbuxus Grow is environment and pollinator friendly.

50 grams of Topbuxus Grow is sufficient for 1m². We recommend applying fertiliser 3 times per season to ensure the Buxus gets all the nutrition it needs.

Use Topbuxus Grow in conjunction with Topbuxus Health-Mix for optimum Buxus care all season.

HOW DOES TOPBUXUS GROW WORK?

The Nitrogen in Topbuxus Grow promotes green leaves, while the Phosphorus promotes a healthy root system for growth. Soluble Potash (an enriched source of Potassium) gives the plant vigour, and a substantial amount of Sulphur is essential for healthy Buxus.

HOW TO USE TOPBUXUS GROW?

50 grams of Topbuxus Grow is sufficient for 1m².

1. Calculate the Buxus coverage area and divide this by the number of square metres to work out how much Topbuxus Grow to apply.
 2. Spread the granular fertiliser at the base of the plant, just beyond the drip line, either on the soil or over mulch.
 3. Water in straight away for an instant result as Topbuxus Grow is fast acting and will absorb quickly.
- Do not spread Topbuxus Grow on leaves.
 - To boost growth, apply once every 6 – 8 weeks or 3 times a season around September, November and February, as soon as you see new buds.
 - Topbuxus Grow can be applied at any time of the year.

WHY USE TOPBUXUS GROW?

Grow healthier and greener Buxus with lush foliage by feeding them the balanced nutrition found in Topbuxus Grow, a fertiliser ideal for all varieties of Buxus. Produce a healthy root system, increase your plant's natural resistance and improve the wellbeing of your plant and the quality of growth all season. Treated Buxus will soon be noticeably greener and stronger looking, and the typical yellow edged leaves and dull colour will fade away.

F.A.Q

When is the best time to use Topbuxus Grow?

Buxus benefit most from fertilising in spring to promote green growth, and in late autumn to promote root growth over winter. During the growing season, apply Topbuxus Grow 3 times around September, November and February, as soon as a new buds appear.

Does Topbuxus Grow or Topbuxus Health-Mix work the best?

Both products are effective on their own but are even better when used in combination. They were designed to assist plant health in different ways and will give you the best result when applied together.

Can I use Topbuxus Grow with Topbuxus Health-Mix?

Yes! When the products are used together the fertilisers provide a complete nutritional system your Buxus crave!!

Do I use a sprayer to apply Topbuxus Grow?

No. This Buxus fertiliser is granular. Apply it to the soil directly or over mulch, and water it into the soil.

Can I apply Topbuxus Grow after I've pruned my Buxus?

Yes. This will give your Buxus a nutritional boost to enhance regrowth and rejuvenation.

Can I over fertilise my Buxus?

Yes. Using too much fertiliser can be just as bad as not using enough. Over fertilising will cause the leaves to brown and may result in branches dying. Apply the recommended amount only. To be even safer, thoroughly water the area before applying any fertiliser.

Is Topbuxus Grow fertiliser safe to use around dogs, cats and wildlife?

Topbuxus Grow fertiliser does not pose any health risks when applied according to the instructions. To be extra safe, after you spread the fertiliser and water it into the soil, allow it to dry before you let your dog or cat into the treated area.
