Genotropin pen Pfizer 5 mg is a growth hormone treatment. It is a man-made copy of natural growth hormone. Fluoride plays a role in the mineralization of your bones and teeth, a process essential for keeping them hard and strong. In fact, about 99% of the body's fluoride is stored in bones and teeth. Fluoride is also important for preventing dental caries, also known as cavities. GENOTROPIN lyophilized powder contains somatotrin, which is a polypeptide hormone of recombinant DNA origin. It has 191 amino acid residues and a molecular weight of 22,124 daltons. The

amino acid sequence of the product is identical to that of human growth hormone of pituitary origin (somatotropin). GENOTROPIN U.S. Medical Information Page - clinical & safety information, ways to contact Pfizer Medical & other resources Visit www.genotropin.com See related articles
