

Waterlogic Firewall™ Cube Sparkling

The Firewall™ Cube Sparkling delivers exceptional sparkling and still water. This sophisticated countertop model features advanced carbonation technology and our innovative Firewall technology to purify the water and sanitize the nozzle with every dispense. The Firewall Cube Sparkling is the only countertop sparkling water dispenser on the market featuring this breakthrough purification technology.

“Analysis has shown that the Firewall is very effective and is able to eliminate even resistant bacteria at concentrations far higher than those permitted by international standards on water regulations.”*

Dr. Lörcher from the Dr. Lörcher Institute,
a respected water testing and certification institute in Germany

Three Steps to Greatness

Your Waterlogic dispenser has three core technologies which mean that what you get out of your machine is much better than what goes in:

1. Filtration: Our filtration technology is really good at taking the bad stuff out and leaving the good stuff in. This stage removes chlorine and other waterborne tastes and odors. **

2. Firewall™: Our Firewall advanced ultra violet light system purifies the water to 99.9999% bacteria free and acts as a final barrier to pathogens right at the point of dispense.

3. BioCote®: The Firewall Cube Sparkling water treatment system is BioCote protected to provide an effective barrier against microbes like bacteria and mold, which may cause odors or staining.

** Dependant on filter type used and water conditions

NEW

unique compact countertop unit for
**PURIFIED and CHILLED
SPARKLING WATER**

Exceptional sparkling and chilled water in a compact design

- Compact and stylish water treatment system suitable for low traffic work environments like small offices, meeting rooms, kitchen and bar areas.
- Stylish looks with intuitive touch sensitive user interface.
- Removable drip tray to easily accommodate sports bottle filling.
- Firewall technology purifies the water at the point of dispense and sanitizes the faucet with every use.
- Plastic surfaces surrounding the dispensing areas are protected with BioCote antimicrobial technology.
- A choice of still, sparkling and room temperature water.
- Certified ultraviolet microbiological water treatment system under NSF/ANSI-55 Class A and NSF P231.

Water options	Technical features	
	Type available	Countertop
	Dimensions	11.6" (W) x 14.8" (H) x 20.8" (D) 296mm (W) x 376mm (H) x 527mm (D)
	Dispense area height	247mm / 9.7" (without drip tray) 155mm / 6.10" (with drip tray)
Symbols  Cold water  Sparkling water  Ambient water	Machine weight	41.9 lbs (19kg)
	Standard filtration supplied	Carbon filtration (CBC) NSF-53 certified for lead, cyst, and asbestos reduction
	Additional features	Firewall UV sensor Smart control panel Touch sensitive user interface Filter change alert Leak detection BioCote antimicrobial protection
	Capacity	Cold tank: 1.3 liter Sparkling tank: 0.5 liter
	Water temperatures	Cold: 41-59°F / 5-15°C
	Compressor	LG Compressor (1/8HP) thermally protected
