

# Wi-Fi Setup Instructions

## SolaX Power

1. With any wireless enabled device such as a laptop, tablet, smartphone etc, navigate to the device settings > Wi-Fi. Here you will see a list of SSID's that are visible, find the SSID **Solax\_\*\*\*\*\*** as shown in the screenshot and connect to it.

Please note, the network may show 'unsecured network' on some devices, this is normal.

2. Once connected to the **Solax\_\*\*\*\*\*** network, open up any web browser on the device you are using. Some browsers will display a 'no internet connection' message, this is normal.

In the address bar at the top of the page. **NOT A GOOGLE SEARCH**, input the following IP address: **5.8.8.8** and press enter on the keyboard

Username

Password

3. A box will appear asking you to enter a username and password. The details for this are **admin, admin**. Both in lowercase,

Static IP

Firmware Version: 2.33.7

MAC address: C8-93-46-76-8B-A2

SN: SWDCBLCZPZ

IP address:

SSID:

Key:

4. Once signed in, this is the screen you will see. We need to click on the **'Find AP'** button.

A new window will appear with a list of available Wi-Fi networks in the area. Please click on your network.

SSID	Signal
SolaX	82%
BUCHER	62%
BUCHER-V	60%
ADSap	25%
AdvancedDiagnosticsTestAP	20%

# Wi-Fi Setup Instructions

SolaX Power

SSID:	<input type="text" value="SolaX"/>	<input type="button" value="Find AP"/>
Key:	<input type="password" value="....."/>	<input type="button" value="Unhide"/>
<input type="button" value="save"/>		

5. You will now be brought back to the first screen, in the '**Key**' box please enter the password used to connect to your own network in this box and click on '**save**'.

Please note this is case sensitive and will not throw back an error if the password entered is incorrect.

Save Config Done!Please wait 15 seconds!!![Return](#)

6. The Wi-Fi connection is now complete. You can close the page down and re-connect back to your own network.
