## NOUVEAU DC CONTROLS

Nouveau DC controls use RF transmission to a receiving unit included with each fan, providing six speeds, reversing and light function (on/off or dimming). Control selection is made at time of order and incorporated into fan item number. Controls utilize dedicated (unique) RF channels to avoid interference with other ceiling fans installed nearby. The wall control (if ordered) also includes a master power switch.

### Wall Control (WC)

### Remote Control (RC)

### Wall/Remote Combo (CC)

\* The Nouveau DC must use one of the above control options. Third party fan controls are not compatible with this product. The Remote Control (RC) can be used in combination with a standard power switch (on-off) in wall box.

\*\* Wall control unit is designed for operation of a single fan/fan light only. For multiple units on a single switch leg, the remote control option can be used if the fans are within suitable range. Contact Modern Fan customer support with questions or for additional guidance.

\*\*\* To replace lost or damaged control components or to add secondary control to existing control sets (e.g. to add a handset to an existing wall control system), contact Modern Fan Co. customer support for ordering guidance.

## DOWN RODS

The Nouveau DC ships standard with 6" and 18" down rods. Use the following part numbers to order accessory down rods.

#DRD	Finish	Length
-	-	-
