FIG.1

PREPARATION

1. Shut off the power at the circuit breaker and remove existing fixture, including the crossbar.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any small parts necessary for installation.

CONNECTING THE WIRES (Fig. 2)

3. Remove the mounting screw (E1) from the fixture.
4. Drill a hole in the wall aligned with the key-hole located in the mounting plate, insert the plastic anchor (D1).
5. Connect the driver input/output wire to junction box wires as shown in Fig. 2, making sure that all wire connectors (A1) are secured. If your outlet box has a green or bare copper ground wire, connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the back plate using the green screw provided. After wires are connected, tuck them carefully inside the junction box.

*** Required the driver to be recessed within the junction box.**

6. Secure the mounting plate to the junction box using the junction box screw (B1). Fasten the mounting plate to the wall using the wood screw (C1). The side of the mounting plate marked "GND" must face out.

MOUNTING THE FIXTURE (Fig. 1)

7. Insert the glass shade on the fixture, and fix the metal cover (F1) using the mounting screw (G1).
8. Place the fixture onto mounting plate and secure it with mounting screw (E1).
