# **COPPER TRIO ROUND**

Copper is created by exploding a thin layer of pure metal onto the surface of a polycarbonate globe. Complimentary forms are created in the trademark mirrored copper, allowing clusters to be formed, lower ceilings to be illuminated or narrow corridors to be colonised by the Copper family.

#### **Process**

Formed using a technically advanced process of vacuum metallisation. The process involves vaporising a small amount of pure copper at a very high temperature and then sucking it onto a surface by applying an electrical charge.

# **Cleaning Instructions**

Clean with a soft dry cloth only. Do not use polishing agents, water or abrasive materials when cleaning. Always switch off the electricity supply before cleaning.
