3. Spit & Rinse

Very easy!\*

\*For best results use Ultrasoft toothbrush.

### Who?

For all adults & children\*  
\*aged 3+ under supervision

Strawberry & Mint  
With & without fluoride

### What?

## Dental hygiene

1. Remineralization: Denttabs toothpastetabs with fluoride have an optimal remineralization potential, as the fluoride in the tablet has been proven to dissolve very quickly and only in saliva, repairing the affected areas on the teeth.
2. Removal of plaque: A clinical study found significant plaque reduction after 14 to 21 days with Denttabs toothpaste tabs.
3. Abrasivity: A clinical study showed that Denttabs toothpastetabs, with their low abrasion value, removed plaque as well or better than toothpaste with a high abrasion value.
4. Natural origin: Denttabs products are COSMOS Natural, Cruelty Free, 100% Vegan, Zero artificial flavors or binding agents or micro plastics, hence very safe to use.

## For your teeth!

All the information on Denttabs you will find here:

# Why? Sustainability

1. Every month, 1.5 billion tubes of toothpaste end up in the garbage worldwide (with up to 14% toothpaste residue) and cannot be recycled. With Denttabs there are no leftovers and no plastic tubes.
2. Everything contained in Denttabs toothpastetabs is bio-degradable. Therefore, it is safe to use Denttabs, e.g., when camping, and spit it out into nature.
3. Denttabs is 0% water, no harmful chemicals, industry compostable packaging, organic inks used and no plastic use in manufacturing.
4. So when you buy Denttabs products, you contribute to our work to save and protect natural resources and environment, thereby a sustainable economy in politics and society.
