

VERTICE CEILING HOOD 36 - 48 inches

VERTICE

VERTICE 36 - 48 inches

FEATURES

- Premium domestic range hood
- Stainless-steel construction
- Welded seams
- Hand-finished edges
- Heavy-duty blower
- Washable grease filter
- Outlet diameter 6" 360° adjustable.
- Reduced overall dimensions of the motor box to allow installation in small spaces
- New double installation system which allows to fix the double to the masonry or directly to the false ceiling
- Light indicator for grease filter maintenance.
- Light indicator for charcoal filter replacement.
- Perimeter extraction.
- Possibility to install the motor in remote position
- Convertible (external venting or recirculating)
- Made in Italy

SPECS

- Motor capacity: 600 CFM
- Control: Remote control
- Lights 6 X LED

ACCESSORIES

- Charcoal filters included

FORTÉ

PRODUCT PLUS

Whilst this stunning VERTICE designer hood will give your kitchen a minimalist and stylish look, the performance is not compromised. The cooking fumes are forcibly extracted through a slit that runs along the perimeter of the hood which increases extraction performance whilst reducing cooker hood noise emissions. The hood boasts 4 speeds and a light indicator to inform you when the grease filters require cleaning. The powerful motor and 6 LED lights are controlled by a functional remote control. The hood can be fixed to the masonry or a false ceiling and, if required, the motor can be installed away from the unit (extraction only).

Light indicator for grease filter maintenance

The cooker hood automatically informs you when the metal grease filter designed for trapping grease in the air requires cleaning. It is of utmost importance to clean these filters to ensure cooker hood components are protected and to pre-vent bad odours caused by a build-up of grease.

Light indicator for charcoal filter substitution

The cooker hood automatically informs you when the active carbon filter requires replacing. This filter is designed to absorb odours produced when cooking. It is of utmost importance to replace these filters regularly as they lose their efficiency and odour trapping performance.

Adjustable and delayed self-switching off

This function allows you to programme delayed cooker hood shutdown which, in the shortest time possible, provides the right level of air purity in your kitchen.
