## PRODUCT DISCLAIMER

### General

Furniture items are to be used for their intended purpose only: to store and to display household items (e.g. sideboards, cabinets, hutches, wardrobes) or to support household activities such as seating<sup>1</sup> (e.g. chairs), eating (e.g. tables) and sleeping (e.g. beds). Users must always exercise caution in operation. Children (and adults alike) should never be allowed to play, climb or hang on the furniture or its components (shelves, doors, drawers etc.).

To prevent serious injury from furniture tip-over, always place the product on a level surface and secure taller furniture pieces to the wall using restraints and wall anchor hardware<sup>2</sup>. To further reduce the risk of injury, place heavier personal items in the lower compartments of the furniture.

Any wall fixtures (e.g. floating shelves<sup>3</sup> & coat racks<sup>4</sup>), are recommended to be mounted to brick or concrete walls. Do not mount floating shelves or coat racks into drywall. Mounting screws should be screwed into wall plugs.

### Caution

Motion furniture (stools, etc.) has many moving parts. Caution must be used in operation (opening, closing, etc.). Children should not be allowed to play on or operate motion furniture. Only the occupant should operate it.

### Materials & Construction

The unique nature of wood and the other materials that are used in production means that no two pieces of furniture will be exactly alike. Small gaps at joints are left intentionally during assembly to allow for natural shrinkage and expansion of the natural wood materials.

### Dimensions

Due to the character of natural products, all dimensions, whether given in metric or imperial, are approximate and are liable to be rounded up or down to the nearest whole number.

### Appearance & Finish

All Nova Solo products are hand finished by skilled craftsmen. This personal touch, combined with the natural characteristics of the materials used, creates a unique product that is truly one of a kind. Slight variations in finish, including color and texture, are to be expected, and are not considered product defects.

Nova Solo Furniture makes every effort to ensure that each item is produced to our exacting standards but cannot be held responsible for slight variations in finish, colour and general appearance.

Imperfections or variations in the grain, color, or sheen of the wood may occur naturally. As a result, these naturally occurring characteristics are not viewed as damages or defects.

### **CARE & MAINTENANCE**

Make your furniture last a lifetime. Although furniture ages with time, proper care and cleaning can help to preserve its original condition.

#### Wood Furniture

Wood is a natural material that is sensitive to its environment. Maintain the appearance of your wooden furniture by setting and maintaining a controlled environment indoors. Keep furniture away from heating or air-cooling sources to prevent changes in temperature and humidity, which can cause unnecessary cracking and warping of the wood.

The wood finish on your furniture is sensitive to UV rays, to prevent changes to the finish, avoid placing the furniture in direct sunlight. To protect the finish against damage from hot or cold beverages and/or hot serving dishes, we recommend using cork or felt bottomed coasters and trivets. To protect the furniture from spills and scrapes, please use place mats, tablecloths, or padded table covers where needed.

Dust your furniture frequently with a lambswool duster and wipe down your furniture with a moist cloth periodically (chamois recommended). For a deeper clean, wipe the furniture down with a damp cloth, dipped in a dilute solution of lukewarm water and mild dish soap. Make sure to dry the surface thoroughly after cleaning. DO NOT use abrasives or harsh chemicals on wood furniture as this will damage the finish and the wood.

#### Rattan Furniture

Rattan is a natural material that is sensitive to its environment. Keep your rattan furniture out of direct sunlight, as it may alter the coloration of the rattan or cause it to dry and split. Brush your rattan furniture on a semi-regular basis to reduce the accumulation of dust and to prevent the growth of mildew. If you notice any canes or poles that have become unwoven, slip them back into their original position by hand.

To clean rattan furniture, wipe the furniture down with a damp cloth, dipped in a dilute solution of lukewarm water and mild dish soap. For cracks and crevices, you can clean the rattan with a toothbrush or another soft brush, dipped in the same solution. DO NOT over-wet the rattan as this may damage the furniture. DO NOT use abrasives or harsh chemicals on rattan furniture. In the event of spills, clean immediately as rattan can absorb coloration from any solution applied to it.

#### Glass Furniture

Glass components are extremely delicate and great care must be taken when cleaning glass surfaces. Glass components should be carefully dusted regularly. Prior to any further cleaning, ensure all dust and/or debris have been removed, as they may scratch the glass during further cleaning processes. For a streak-free clean, use a microfiber cloth and a cleaner specifically formulated for glass. Ensure the cleaner is only applied on the glass surface, or preferably onto the cloth, as it may cause damage to the product finishes on the other component materials of the furniture. Clean the surface with light pressure and ensure it is dried completely. DO NOT slide rough objects across glass, this may cause permanent scratches to the surface. DO NOT use abrasive cleaners on glass. DO NOT clean without gently removing any excessive dirt or debris in advance.

#### Hardware

Dust the hardware regularly with a microfiber cloth. In the event you need to clean the hardware, we recommend using a mild detergent (e.g. dish soap and lukewarm water) and a soft cloth. Please ensure you dry the hardware afterwards. DO NOT use or apply harsh chemicals, abrasives and/or cleaners as product damage could occur. DO NOT refurbish hardware.

#### Cushions

To maintain the condition of the cushions, keep them out of direct sunlight and flip/rotate them routinely. In the unfortunate event of spills, clean the spill immediately with a damp cloth. Remove the cushion cover and ensure the inner foam is cleaned and given time to fully dry afterwards. For a deeper clean of the cushion cover, you may wash it in the washing machine in cold water, using a mild detergent. Please ensure the zipper is closed prior to placing it in the washing machine. The cushion cover should be air dried. DO NOT place the cover in the drier as it may cause shrinkage. DO NOT place the

cushion foam in the washing machine or drier as it will be permanently damaged.

### **ENVIRONMENTAL RESPONSIBILITY**

KAN is a national accreditation committee that is in charge of and responsible for the accreditation of conformity assessments, which include assessing sustainable production forest management and timber legality practices. SVLK is an internationally recognized verification system that is overseen by the department of forestry in Indonesia.
