

## ZRW READY BUILT WOOD FIRED OVEN

The ZRW is the new version of the Z1100 (As Seen on TV 'Master Chef' and used by Celebrity Chefs worldwide). The latest design in woodfired pizza ovens is revolutionary and is what we consider to be the perfect woodfired oven.

Its streamline external stainless steel finishing touches make this oven blend in perfectly with other items such as BBQs, fridges, and sinks.

Made in Australia from premium quality refractory and insulation materials. This outdoor oven is easy to use and retains the heat for many hours for slow cooking, roasting and gourmet wood fired pizzas.

The top of the range ZRW has a unique alloy capping dome instead of the traditional render. Can be mounted on a traditional brick and concrete supporting base or on the mobile trolley making it completely portable. The underneath section of the stand can either be left open for wood storage or it can be enclosed with a door as an option. The stand working height can also be customised to suit the client's requirement. The unit also comes with a removable 1000mm length of flue and a stainless steel roasting door.

The ZRW oven steel ring, door and flue is made from high quality 304 grade stainless. The beautiful front arch is 316 Grade Stainless Steel.

The cooking chamber features a one-piece custom poured refractory dome poured to a commercial thickness for a long life span and for fast lighting and heating results.

The one piece refractory dome enables the oven to hold temperatures up to 10 hours making it perfect for entertaining. The stand has adjustable feet or it can come with heavy duty castors so that it can be mobile as a trolley.

- External Oven (Excluding Chimney): 104cm W x 99.5cm D X 52.5cm H
- Overall External (with Stand and Flute): 180cm H
- Internal Oven: 80cm diameter

## BASE DESIGNS:

## CARE AND MAINTENANCE

The ZRW oven is made from high quality 304 grade stainless steel components.

Maintenance of your oven is quite simple and involves nothing more than regular cleaning with a good stainless-steel spray or cleaner that is available from most supermarkets and hardware stores. Depending on your location, frequency of cleaning will vary.
