COAST BEANBAG FILLING INSTRUCTIONS

HOW MUCH FILL?

The chart on the right indicates the optimum volume of beans required for each beanbag.

Marine Bean and Bach Basics

Do not overfill your beanbag. You should be able to sink well into your beanbag (without touching the floor).

Isla Collection

These beanbags are designed to be filled to about 90–95% capacity.

FILLING YOUR COAST BEANBAG

This is a two person job.

Your beanbag comprises an (internal) liner and an (external) shell.

1. Unzip the liner (you will need to use a paperclip).
2. While one person holds open the opening in the liner, the other should slowly pour in the beans.
3. Unzip the shell and shake the (filled) liner into the shell.
4. Ensure that the (filled) liner is correctly orientated inside the shell – the panels of the liner should match up with the corresponding panels of the shell.

Isla Chair	550	19.50	2.75
Isla Lounger	800	28.25	4.00

SAFETY ZIP

For your safety, the liner of your beanbag is fitted with a locking zip.

To open and close the liner, slide an unbent paperclip through the top of the zip slider and use it to pull the slider up or down the zip.

When you have filled the liner, close the zip securely and remove the paperclip.

Please contact us if you have any questions relating to the safe use of your beanbag.
