This item is the 50 mg/ml injectable solution of the anabolic steroid Oxymetholone, which is manufactured by the pharma company ZPHC. This steroid can be also called Anadrol. The product is sold in 10 ml vials, which are

used for multiple injections. Oxymetholone is the well-known steroid for ... Oxymetholone is a potent oral anabolic steroid that first appeared in the 1960's under the trade names Anadrol 50 (Syntex) and Androyd (Park Davis & co.) To this day the Oxymetholone hormone is normally referred to as Anadrol in most circles. When the steroid was first released it was touted as holding numerous therapeutic benefits. Oxymetholone is an anabolic steroid, which is a man-made form of a hormone similar to testosterone. Oxymetholone is used to treat certain types of anemia (lack of red blood cells), including anemia caused by chemotherapy. Oxymetholone will not enhance athletic performance and should not be used for that purpose. <https://www.klusster.com/portfolios/zacepinapetruneja/contents/140914>
